Welcome to SCYC!

We are very excited to continue hosting our program at the Junior/ Senior High School. As we move forward, we will be hosting club in the home economics room, which will offer the students a more comfortable space to complete homework, have something to eat and a safe place to hang out.

We understand that at this age, afterschool can be a busy time. Many students have sports or other activities. Whether our students need a quick snack, homework help or a sandwich through the Subway Eat Fresh program, we want to be a resource for you. Please contact club for more information on how we can be an asset for our families.

We know that the academic needs of our students are important to everyone. We will be working with teachers as well as hosting one on one tutoring, a homework rotation, academic activities and social/ recreational centers. We hope to provide the support that every student needs to be successful. We will continue to offer a variety of camps such as STEM, Fine Arts, World Exploration, Culinary, PE and board/card games. The students may choose from several of these each day. These camps will rotate through the month so they will have many choices of activities and learning opportunities.

Camps

To keep things interesting for the students, we will offer a variety of camps. This month's camps include:

Explore: This camp will allow students to experience the wonders of the world around them by exploring Argentina. We will be looking at traditional food, activities and games that those who live in the country enjoy.

STEM: Your students will use hands-on activities to build, test, and create while still learning important Science, Technology, Engineering and Math principles. Students will explore Nanotechnology and create bouncing balls, bridges and sling shots. These activities are designed to be fun while still following Indiana Academic Standards.

Culinary: Your students will release their inner chef by exploring the culinary arts. They will be able to create a dish they may have never tried, like Korma. While learning new culinary skills they learn nutrition too.

Create: The students will unleash their inner artist as they express themselves by making artist coins. The students will design their own coins which they can keep or trade with friends.

For more information be sure to like us on Facebook or visit our website, www.thescyc.org.

Thoughts from your Coordinator

Celebrate Family Day – A Day to Eat Dinner with Your Children™, Friday, September 22nd, by joining parents all across the country to take the Family Day STAR Pledge to commit to:

Spend time with your kids by having dinner together,

Talk to them about their friends, interests and the dangers of drugs and alcohol, Answer their questions and listen to what they say.

Recognize that you have the power to keep your kids substance free!

Family Day – A Day to Eat Dinner with Your Children is a national movement launched by The National Center on Addiction and Substance Abuse at Columbia University in 2001 that promotes the parental engagement fostered during frequent family dinners.

Every family is also strongly encouraged to attend our local celebration on Friday, 9/22 at 4:15 PM. Be sure to watch the sign out table for invites. We are excited by the opportunity to share and celebrate families at S.C.Y.C. We look forward to building memories and hope to see you there.
