**An Interview with Mr. Dance– By Michael G., Merek S., and Dakota W.**

For our NEWSGROUP station, these three students came up with a set of questions for an ODHS teacher. They interviewed him and then collected the response. Below is an excerpt from their interesting exchange with Mr. Dance. Enjoy!

**Are people named Suzy and Billy really inside your beard?** “No.”

**How Long is your beard?** “ My beard has been used to bind the feet of Jormungandr.”

**What was your favorite subject in school?** “ My favorite subject in school was English with Art as a close second.”

**How long have you been working here at OD?** “ I have been at OD for 2 years.”

**Is your beard the longest now that it has ever been?** “ My beard exists in a quantum state of infinitely long and infinitely short until observed so no and yes.”

**What is the hardest thing about teaching?** “ The hardest thing about teaching is the smell, seriously. More showers, guys.”

**Tutoring**

SCYC-ODHS is very lucky to have the skills of Ms. Vogel on our team this year. Not only can she assist our students with basic homework completion, but she will also be able to provide tutoring for students with the greatest need. If you know your student is behind or already struggling, please contact me at the numbers provided in the top right of this newsletter. We will set up a schedule for your student to get extra 1:1 academic help. Spots are limited, so be sure to call right away.

**SCYC-ODHS Family Meal!**

Our students are ready to create a meal for YOU; their family! Come and join us on Monday, September 18th at 4:00 PM Central time in room 204 at ODHS for a sit-down meal that will be created and served to you by your students! The students will develop the menu, cook all the dishes, and then present them to you as a thank you for all you do on a daily basis!

For more information on The Starke County Youth Club, visit [www.thescyc.org](http://www.thescyc.org).

**September Stations**

This month our students will try their hand at SCYC-ODHS with a number of exciting stations.

In our **CREATE** stations the students will be able to create some unique art projects including making a loom out of used books, artist coins, and inspirational “hand” messages.

Our **CULINARY** stations this month will have our students creating lasagna roll-ups and Korma with rice and naan.

Our **STEM** stations will offer information on exciting careers, an opportunity for students to create a stair climber LEGO robot, explore nano technology , sling shots, and bouncing balls, and end with a toothpick bridge challenge!

In our **EXPLORE** station we will learn about the culture of Argentina.

Our **NEWSGROUP** station will allow the students to report on a sporting event and then create an article for our monthly newsletter.

We will also have **Game Room** stations weekly that allow the students to participate in board games or card games as well as a **MOVE** station that includes a corn hole and open recreation opportunities!

Be sure to contact Ms. Amber for membership information, if you would like to join the fun!
