### An Advertisement for Youth Club

Each month at club, we offer a station that invites the students to create content for our newsletters. For our NEWSGROUP station in October, the students learned about advertising. They were able to work together to create an advertisement for why other kids should join Youth Club. They did a wonderful job combining everything they learned to create a strong message. Below is an excerpt from that advertisement:

Are you bored after school? Do you need a place to get some homework help? Did you know that you can come to the Starke County Youth Club afterschool daily to get all that and more? SCYC offers a range of activities from cooking, to art projects, to even building your own LEGO robot every month! At SCYC the staff are there to help you with any questions you have, there is a teacher there to help with homework, and you get the chance to make some really exciting projects!

Come Join SCYC at ODHS today! You will not regret it!

For more information on The Starke County Youth Club, visit [www.thescyc.org](http://www.thescyc.org) and be sure to like us on Facebook.

### Family Monday at ODHS needs YOU!

Every Monday at SCYC-ODHS we have the opportunity for family members to come and get involved with their students for “Family Monday.” This event runs weekly from 4:00 PM CST– 4:45 PM CST. Our goal is to have students and their families come together to get to know one another, share in activities together, and also learn about career exploration and other community topics.

We have at least one guest speaker a month, and we also do fun events like family board game nights, charades, community service projects, lots of other exciting activities. The more involvement we can get on our Family Mondays the greater the scope of activities we will be able to offer! Sometimes our students will even make some treats or food for their families to sample! What better way to connect with your students and to see what they do at SCYC-ODHS than to come to Family Monday. We hope that we will see many of you there soon!

*Building a brighter tomorrow.*

### November Stations

This month our students will spend a shorter time at SCYC-ODHS with our Thanksgiving break, but will still take part in a number of exciting stations.

In our **CREATE** stations the students will be able to create “art in the shadows” with glow in the dark paint. They will also have a chance to create silk screen prints on a t-shirt!

Our **CULINARY** stations this month will have our students creating homemade pizza and smoothies.

Our **STEM** stations will offer the students the opportunity to explore nanotechnology, create a piano out of a potato, and they will also create their next LEGO robot.

In **EXPLORE** we will learn about the culture and traditions of Bolivia.

Our **NEWSGROUP** station will allow the students to learn about creating and presenting a survey, and will result in a survey created by our students for next month’s newsletter!

We will also have **Game Room** stations weekly as well as a **MOVE** station that includes corn hole and bowling, and open recreational opportunities!

Be sure to contact Ms. Amber for membership information, if you would like to join the fun!
