

Lake Templene Improvement Board Meeting

Joint working session between the LTIB board members and the Advisory Group members

A special meeting will be held Monday, May 1 at the Nottawa Township Hall in Centreville at 6:00 pm. The meeting's purpose is to prepare a draft management plan for the next 5 years to address Lake Templene Improvement Projects including bottom land removal, fish habitat, and aquatic weed control and possibly plans to partially restore the Sauger Lake swimming island. The main focus is developing a management plan that will be required as we transition from PA 188 SAD to Part 309 SAD. Interested Lake Templene property owners are welcome to attend this initial work session.
