The permits for aquatic plant herbicide treatment for 2018 have been filed with the DEQ. Dr. Anna Monfils of CMU has been contacted about the unexplained significant reduction in Starry Stonewort. **8 New Business**

- a. Proposals by Spicer and Progressive AE relative to work to be performed on our bottom sediment reduction program were introduced. Tony Groves, Progressive AE, has been working with Emily Short, Spicer Group, to firm up a 5 year budget for DEQ required monitoring of Lake Templene for aeration and bio-augmentation. The cooperative effort is to streamline necessary compliance work to keep costs down and ensure that Spicer does not exceed agreed to contract budgeting. With the new 5 year SAD in place water quality monitoring does not have to be done for the initial 2 years. This year only bottom sediment surveying and reporting needs to be done by Spicer... The SAD also will address fishery enhancement and island stabilization. Tony offered a proposal to administer the work with Spicer to firm up a year by year budget, monitor work being performed, etc. for an annual fee of \$7,500. It was agreed that a nearby advisory committee meeting will be held to discuss both Spicer and Progressive AE's proposals with a recommendation to be offered at the next LTIB meeting scheduled for April 5, 2018
