

September 10, 2018

Ben Beckwith
Hilltown Pork Inc.
12948 State Route 22
Canaan, N.Y. 12029

Dear Ben,

Congratulations on passing the review of your slaughter facility conducted by the Certified Animal Welfare Approved by AGW (AWA) program. A copy of the review is enclosed for your records.

The Certified Animal Welfare Approved by AGW program appreciates your cooperation in providing our Slaughter Plant Review Specialist with access to the plant and your efforts to ensure the proper handling and slaughtering of animals, thereby acting as a role model in the slaughter plant industry.

This letter of compliance may be posted on your premises and confirms Hilltown Pork Inc., 12948 State Route 22 Canaan, N.Y. 12029 at the time of visit by our Slaughter Plant Review Specialist, passed the Certified Animal Welfare Approved by AGW program's slaughter plant review for Pigs, Sheep, and Beef cattle on August 23, 2018 and thereby is in compliance with 1) Certified Animal Welfare Approved by AGW requirements for humane pre-slaughter handling including the American Meat Institute Recommended Animal Handling Guidelines and 2) Federal Humane Slaughter Act regulations.

The confirmation is valid for 30 months from the date of issuance. If compliance concerns arise prior to that date, our Slaughter Plant Review Specialist will follow-up and offer assistance in achieving a resolution.

For plants that farmers in the Certified Animal Welfare Approved by AGW program are using we will offer continuous support to help you achieve the highest standards within the processing plant industry. If no assistance is needed, we will touch base again on a yearly basis, provided farmers in our program are still using your services, to ask permission to do another review in order to keep the farmer in good standing. We will notify the referring farmer that your plant passed the review. All other information shall remain confidential.

Thank you for your cooperation.

Sincerely,

A handwritten signature in black ink, appearing to read "Julie Walker".
