

## **EXHIBIT "H"**

### **SAFETY MANAGEMENT PLAN**

Prior to starting the Scope of Work, Subcontractor is required to prepare a site specific safety plan for this Project and provide such plan to Contractor for review. Subcontractor agrees to modify its safety plan to adequately address any comments provided by Contractor and/or Owner. Contractor's review of Subcontractor's safety plan, if any, does not relieve Subcontractor from its obligations to perform the Scope of Work safely and in accordance with the requirements of the Contract.

Contractor's Safety Plan will be developed for this Project and subsequently submitted to the Owner for review and, if necessary, will be updated accordingly. Subcontractor, at no cost to Contractor, shall comply with the portions of the Contractor's Safety Plan which are applicable to the Scope of Work, including any portions which may be revised, amended and/or updated from time to time.
