19.5 grains Blue Dot	260 grain
Overall Cartridge Length 1.580" +/- .005	
All Wildey cartridges use large pistol primers	

We have found Blue Dot by Alliant Powders gives outstanding performance in the Wildey cartridges. Blue Dot has a strong reputation in heavy shotgun loads and is a favorite among many for magnum handgun loads. The Wildey cartridges tend to bring out its best. Clean burning! Yes, not only does it push fat heavy bullets fast, it is the cleanest burning powder in our cartridges. This means your Survivor's unique gas operated system will perform as it is designed to, shot after shot. We strongly advise resisting the urge to try other powders. Years of trial and experimentation have resulted in the fine loads listed above.
