

Welcome Home

YOU FOUND YOUR PLACE. WE MAKE IT HOME.

Towery Builders, Inc. has been crafting fine homes in Western North Carolina since 1995. Superior craftsmanship, knowledge and experience allows Towery Builders to design and construct the home that makes your dreams a reality.

Towery Builders is owned and operated by Tim Towery. Tim began his career as an engineer before transitioning into General Contracting with over 25 years of experience in the industry. This combination of training and skills has earned Tim a reputation for providing quality finishes, and perhaps more importantly, exceptional attention to the crucial, but not so glamorous foundational integrity in a home that is never seen once drywall is hung.

Their focused attention has earned Towery Builders consistent rave reviews from clients.

*You are building a home, not a house.
We know the difference.*

Having constructed homes from 1000 square feet to mini-estates, each of Towery Builder's clients enjoy the high quality Tim consistently provides.

Their approach is simple. "We keep a very limited number of homes in process at a time," says Towery. "We understand that a custom home is typically the largest investment most families make. We are convinced that in order to build homes that exceed our customers' expectations, we have to manage every phase of the project in order to achieve exacting standards of quality." Tim is on the jobsite daily to ensure all work is performed with superb craftsmanship for which he is known. Clients are often surprised and impressed to witness Tim strap on a tool belt and actively participate in the execution of a complex detail of a home.

If a green home is your goal, Tim's repertoire includes advising clients on constructing eco-friendly custom homes using sustainable, reclaimed and recycled products. His green homes include passive solar hot water, radiant floor heating, ductless air conditioning, low VOC paints and glues, pure wool stair treads and natural cork flooring. Recommendations may be made on Energy Star appliances. Tim is skilled at correctly siting a home to maximize southern exposure for optimal positioning of solar panels or passive heating. While the choice over materials is entirely the homeowner's, Towery Builders takes pride in offering green building as an option.

You invest wisely. We build happy returns.

Referrals drive almost 100% of Towery Builder's business. This is a source of tremendous pride since these recommendations cannot be purchased with advertising dollars, but must be earned one client at a time. Tim guides the homeowner through the building process in a way that is completely transparent, with the customer making important decisions throughout the process, so there are no surprises. "Whether the customer chooses Towery Builders or another contractor, the most important advice I give someone considering building a custom home is to make sure that they are very comfortable with their builder upfront. It is likely to be a very close relationship for many months and the level of trust and communication is crucial to a successful build and it makes the process enjoyable," says Towery. No matter the budget, every client deserves to have their resources used frugally and wisely. Tim's customers will tell you that he builds each home as if it were for his own family and watches expenses as if these were his own. Limiting projects to only a few each year, Tim is committed to his processes and takes his time working on each and every home. Unlike production builders, Towery is not in a hurry to finish and move on to the next job.

Towery Builders specializes in building quality custom homes of all sizes in and around Asheville, North Carolina. Tim grew up playing in the woods and creeks in Asheville, where he and his wife Lynn have chosen to rear their own three children. Tim enjoys athletics, is an avid sportsman and active volunteer in the community in which he lives and serves.

Stunning Architecture

Gregory Paolini Design is a local woodworking shop, specializing in bench-made custom cabinetry, furniture, and architectural millwork. Our clients receive personal service and artisan level attention to detail, which can only come from items made by hand, resulting in unparalleled customer enthusiasm.

We design and build cabinetry for every room of your home, to suit your needs and tastes, and we don't outsource - Every part of your project is created specifically for you, by our skilled craftsmen. This helps us to maintain the quality, and adherence to schedule, which your project demands.

Our team can provide full cabinet design and planning services for both Traditional and European styles of cabinetry, however we're also happy to work in conjunction with your architect or designer, executing their designs for your home.
