Non-Credit Courses

LICU's Life Changing programs can now also be taken as **non-credit courses**. This is especially helpful for students who are NOT looking to become a regular student of this university or earn a degree, but still want to benefit from the revelation rich teaching that is provided through LICU's courses.

This approach to study is particularly favourable for those (*such as leaders, ministers and church members*) whose current affairs/responsibilities max their time allowance. And yet who still desire to further their personal education or advancement without the added pressures of exams and other course requirements.

In addition, once purchased, LICU courses can become a very valuable teaching resource in your hand, to be used over and over again, to benefit others in your realm of influence (*personal study, home groups, Sunday School and bible school classes etc.*). For more details on association/affiliation for transferrable credit hours please click [contact our office](#).

Certificates of Completion

If you choose this method of study, you must register for all nine of LICU's first level non-credit courses, before you can apply for the **"1st Level Certificate of Completion."** Also students who qualify for this certificate are welcome to participate in the LICU Graduation Ceremony (*on the non-credit level*).

Please Note

Any courses completed on this level, exclude all normal course requirements and processing (*i.e. marking of exams or research papers, ministry practicum/monthly counselling forms*). Consequently however, since these are non-credit courses, this means that they are without credit hours that are transferable toward degree completions at LICU. Thus it is not possible to have credit awarded retroactively if you participate in courses on this non-credit basis. Therefore it's important to think about your longer-term goals when considering the non-credit option. (*Please contact our office if you are unsure.*)
