

Pigeon

Pigeons will quickly take over building into which they move. Pigeons have 3-4 batches of 2 babies a year, and like to eat broccoli leaves, along with corn and many other garden foods, grains and carrion. Plus, with a high quantity of birds, the manure will quickly build up. A few pigeons will quickly turn into a flock. Huge flocks of pigeons also pose a health problem, because of this. We can bird proof buildings and landing areas, as well as trap and remove birds. Call today for a fast removal.
