

Codes & Standards

March 2019

1. February article submitted to The Whistle for publication
2. March 2019 posting to FHEA website with flowchart describing process for fire department radio communications within buildings. First due date is Dec 31, 2019
3. Bobby Baird applied to and subsequently selected to serve on NFPA Healthcare Section, Mechanical sub-committee. Any issues with mechanical code language should follow traditional comment pathways, but having a local voice on the committee helps, especially since no one (In FL) seems to humidify supply air in the winter, which is contrary to code language.
4. Bobby working on NFPA 99 healthcare user appointment.
5. No code issue requests for ASHE or NFPA have been received from FHEA during the last six months
