

Subject: Education update for board

Completed a discount with MGI for CHEPP program 15% DISCOUNT using our web site as sign up link. Multiple person discount also available for one location with multiple techs needing education can email Danny Chisolm through the web site for costs. I think the 15% may be better cost point already.

Looking into medical gas maintainer certification also an online program will set up with a discount through our education page link once done.

Need web site Education page approved. Susan built it last year and its ready to go, no cost for time at this point. We talked about it last year just never approved a cost, which turned out to be no cost as it was quick.

Looking for direction on major education event for each district, for example ASHE door inspection one day training or Joint commission prep program which is new in 2019. Would state pay for the program for each district and district would have to provide location and food on their budget.

What would the districts like for education needs and direction on where they may need assistance. Send email to me if any needs.

For discussion as I don't know? Is every district getting CEU for most of the meetings the hold? D1 does 5 out of 6. Very important for CHC CHFM ect.

Is there any interest in scholarship for Owensboro college HFT training program, cost is about 2K, its 3 college courses which count toward the facilities associates degree if the person continues on to get the degree.

thanks

Jeff Walters, CHFM,CHC,CHE,CHEPP
