HOSPITAL SUSTAINABILITY COLLABORATIVE

promoting health, lowering costs, and reducing environmental impact

Sign-up to attend the first Hospital Sustainability Collaborative Program being held on May 16th when completing your registration for the FHEA Spring Meeting.

The Hospital Sustainability Collaborative Objectives are:

1. To engage hospital and health system executives, engineers, and facility managers in the development and implementation of measurable solutions to reduce operational costs and environmental impact and to provide a safe and healthy environment for occupants.
2. To distinguish and promote hospital best practices in Florida through information sharing and by providing education and resources that advance change and result in demonstrable community benefit.

Win a \$25 gift card for answering a few questions, click on the survey link below!

Four randomly selected survey respondents will win.
