
Health First, Central Florida's leading integrated healthcare delivery network (IDN) is looking for our next **System Facilities Director**.

With 4 acute care hospitals and a total of almost 90 locations in our system, it requires a strong leader who manages teams and projects over multiple facilities. We need someone willing to be in the field with our employees and ensure that everything is running smoothly – and who has the plans to execute when things aren't.

Health First offers challenging work in a values-based environment. Our Central Florida coastal location means a warm climate boasting year-round activities. Our cost of living is reasonable - and a short drive from Orlando.

If you have 5 years' experience in multiple location facilities management, earned your college degree and hold a current CHFM (Certified Healthcare Facilities Manager), let's talk about your next career move to the Space Coast of Florida.
