

FHEA HSC Report

February 2020

General Updates:

- 1)** There is now a team of 5 supporting members and 2 active members volunteering time to help with the HSC effort
- 2)** 11 new hospitals have shown interest in registering their facilities in ESPM/E2C
- 3)** The HSC has monthly meetings to discuss our efforts which I can invite you both to in the future if you'd like to participate
- 4)** The ASHE Chapter Challenge team creation deadline is April 1st (this is our current biggest priority)

Questions for the Board:

- 1)** As facilities join ESPM and share their data with FHEA, how does the Board envision using this data?
 - *Can create average EUI and other KPI measures for the state
 - *Identify efficient facilities and use them for Case Studies, Panels
 - *Set up a 10 minute slot during FHEA meetings for an Active Member to present how they manage energy at their facility
- 2)** Are there any facilities the Board is aware of that would be good candidates for participation in the ASHE Chapter Challenge?
- 3)** Could FHEA benefit from a closer relationship with FHA?
 - *If so, how can this be achieved?
 - *How could we support one another to drive sustainability initiatives at the member facilities?
