

In a surge situation, pretty takes a back seat to practical! Patient care providers are the tip of the spear when it comes to managing the Covid-19 crisis. Access to equipment, supplies, PPE and disposal of hazardous sharps and waste are of the most basic of needs. Paladin's free-standing headwall and FTC Forward Treatment Carts are deployed in minutes not hours, bringing all necessary means to deliver safe and appropriate care to any non-traditional space i.e. convention centers, schools, hospital lobbies, anywhere.
