

Non-Invasive ICU Overflow Surge Solution Update!

Here are just a few examples to highlight the ability Paladin Healthcare provides to expand from a very simple low acuity patient or exam room, to a fully capable Critical Care and surge management point of care.

This is one more layer of capability we add to our overall surge management toolbox.

Conversely, when the crisis is over, the entire room can be stripped down to bare rail in order to do an effective terminal clean.

We have solutions immediately available to help you meet patient care needs!
