

ART ON Glass

The masterful photography and designs of Geri Dibiase are combined with the ancient art form of “Eglomise” to produce these beautiful and unique glass ornaments.

Eglomise is a Chinese art form that began in the early 1800’s. Painters using small, curved brushes insert the brushes into the small hole at the top of the blown glass ornament to recreate images on the inside of the glass. Each piece is handcrafted to create a keepsake that can be treasured for generations.

Let's create a custom collectible!
