

HUMAN UNITEC INTERNATIONAL INC  
NASDAQ OTC: HMNU

Human Unitec International Inc., NASDAQ OTC: HMNU (HMNU) (The Company), is an International Project Financing, Development, and Asset Management Corporation based in Miami Beach, Florida. HMNU specializes in financing and development of medical and wellness projects, renewable, water desalination and alternative energy projects and emerging growth companies (Green Energy).

Since February 2016 HMNU is developing a project for the construction of the of the first patented technology GRONE System and the construction of the first plant. The Grone is a versatile waste sorting center that acts not only as a recycling center, but also a power plant aimed at eliminating the need for landfills. The primary purpose of the Grone is to sort and recover Municipal Solid Waste (metals, glass, plastic, textiles, paper, bulky waste). The Grone separates each resource and allocates it to the proper recycling zone through an assembly line consisting of a 4-stage process. Whatever waste is unsalvageable is then used as a nano-structured solid fuel to maintain its perpetual power system.

As of March 2th 2017, HMNU entered in to a preliminary binding contract with MSK KINESIS CORPORATION (MSK KINESIS), operating in the medical and wellness industry, for the acquisition of the of rights of the MSK KINESIS TECHNOLOGY. [www.msckinesis.com](http://www.msckinesis.com)

“MSK KINESIS Devices offer cutting edge technology for medical and wellness treatments that have been proven effective in Italy and Europe for over 14 years. Working with the researcher MD Prof. Riccardo Milici, we have developed the technology and methods to improve a wide array of patients physical medical needs”, stated Jennifer Adamson, President of MSK KINESIS Corporation and Member of the Board of the UK based Kinesis Group. MSK KINESIS THERAPY makes it possible to treat, for the first time, the body’s myofascial “Band”. “This is revolutionary, stated Barbara Molnar, President and Founder of the MSK KINESIS GROUP, because the Band not only holds together the organs and bowels, but is a sophisticated semiconductor system for high intensity piezoelectric energy contained in protein and collagen. Every bone, muscle, nerve or lymphatic blood vessel is surrounded by a layer of connecting fabric, which is tasked to support and protect these elements. In the past,

it was anatomically considered as an inactive tissue, with limited functions. Today, the new biomechanics insight considers the Band as a fundamental part of the connection tissues action, effecting our muscles, strength, postural, motor and emotional behavioral wellness. The Bands integrity and elasticity allows the body to maintain a fluid integration between a bio mechanic request for constant postural adaptation. The tension limits the capacity of movement and muscle overload resulting in an energy expenditure. Movement does not become metabolic activation of being, but rather a physical suffering with limitations that reflect on one's mood, ultimately effecting restlessness, low capacity reactivity and anxiety".

### **Forward-looking statements**

This document contains certain forward-looking statements with respect to the financial condition, results of operations and business of Human Unitec International Inc., (HMNU), a startup company, and certain of the plans and objectives of HMNU with respect to these items. Examples of forward-looking statements include statements made about our strategy, estimates of sales growth, future EBITA and future developments in our organic business. Forward-looking statements can be identified generally as those containing words such as "anticipates", "assumes", "believes", "estimates", "expects", "should", "will", "will likely result", "forecast", "outlook", "projects", "may" or similar expressions. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances and there are many factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements.

These factors include, but are not limited to, domestic and global economic and business conditions, the successful implementation of our strategy and our ability to realize the benefits of this strategy, our ability to develop and market new products, changes in legislation, legal claims, changes in exchange and interest rates, changes in tax rates, pension costs and actuarial assumptions, raw materials and employee costs, our ability to identify and complete successful acquisitions and to integrate those acquisitions into our business, our ability to successfully exit certain businesses or restructure our operations, the rate of technological changes, political, economic and other developments in countries where HMNU operates, industry consolidation and competition. As a result, HMNU actual future results may differ materially from the plans, goals and expectations set forth in such forward-looking statements.
