NOVACAB FOUNDER PRESENTS AT NY-BEST

ALBANY (March 8, 2017) – Novacab founder and chairman, Stephane Bilodeau presented at the NY-BEST Annual Meeting and Conference: Capture the Energy 2017. The conference was made up of industry experts presenting and discussing the essential role for storage in reducing greenhouse gas emissions, transforming the electric grid and advancing clean transportation solutions.

Bilodeau's presentation was over Integrated Thermal and Electric Energy Storage System and Novacab's use of Synthetic Phase Change Material that has a small negative expansion factor and much lower maintenance than water or salt systems.

Novacab, along with other industry leaders, contributed their ideas to bring innovation to the future of energy storage in New York.

About Novacab

Novacab's mission is to provide clients with premier, innovative and green technologies. Their outstanding team, staffed by skilled, attentive and efficient people, is thriving to develop and manufacture smart energy storage technologies that can benefit to industrial processes, buildings, and vehicles.
