FOR IMMEDIATE RELEASE

MID-TERM PROGRESS REPORT ON THE PILOT PROJECT WITH PAPINEAU TRANSPORT

CANDIAC, QUÉBEC (December 14, 2010) – Novacab is happy to report on three months of testing for two units in operation in the Pilot Project with Papineau Transport International. The results are validated by the Telemetric System installed in each of the two trucks.

The total idling time reduction up to date averaged more or less 6.5 hours per day, corresponding to \$960 savings per month per truck.

The full report, case study and official monitoring results can be found on the Novacab website.

About Novacab

Novacab's mission is to provide clients with premier, innovative and green technologies. Their outstanding team, staffed by skilled, attentive and efficient people, is thriving to develop and manufacture smart energy storage technologies that can benefit to industrial processes, buildings, and vehicles.
