POST TENSIONED CONCRETE

POST-TENSIONED CONCRETE CERTIFIED FROM POST TENSIONING INSTITUTE
FOR BONDED AND UNBONDED SYSTEMS

We are certified from the post tensioning institute to install and inspect the bonded and unbonded post tensioned structures.

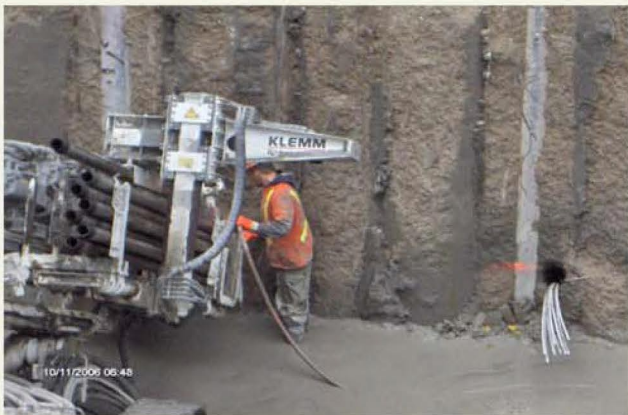

Our services include also producing shop drawings.

We also provide a complete engineering design for post tensioned slabs

SHORING DESIGN

We provide construction companies with many types of structural services such as shoring design using soldier piles/timber lagging and vacuum excavation

EARTH WORKS, SOLDIER PILES AND TIMBER LAGGING

VACUUM EXCAVATION

COLD FORMED STEEL

We are very experienced in designing loads bearing walls and wind walls using cold formed steel structures. Our services include shop drawings and connection details. Our projects are in different location in Ontario and include training centres and processing plants and etc..

CONSTRUCTION SERVICES

We help construction companies to use the most effective techniques and develop new systems to save time and costs for our clients throughout the construction process
