

## **Realignment for Cycle 2020-2021 and 2021-2022**

### **Process of Consideration and Final Adoption**

1. Development of the proposal ( December 2019)
2. Review and change where indicated by District 10 County Representatives (Realignment Committee, late December 2019)
3. Dissemination to schools for review (Late December 2019/Early January 2020)
4. Review and change where indicated and final adoption by the District 10 Committee (January 2020)

### **Region Realignment Proposal Will Contain**

#### ***Information by sport:***

1. Classification cutoff numbers
2. Number of teams in District 10 in each classification by sport
3. PIAA Calculated Classifications for each school in each Region
4. Teams playing up have a + next to them
5. Co-op teams have a \*\* next to them
6. Current cycle (2018-2020) region breakdown
7. Proposal of region outline by sport for 2020-2022
8. School enrollment numbers

#### ***Considerations and general principles utilized for Re-alignment:***

1. Number of total teams in a classification.
2. Reasonable size of regions (and therefore reasonable number of region games) given the total number of games permitted for each individual sport.
3. Reasonable opportunities for tournaments and other non-league scheduling in appropriate sports.
4. Geography as much as possible.
5. No region will have teams spanning 3 classifications with the possible exception of where there are limited teams of largest classification.

6. Subject to the exception of #5 above sports purity in classification is problematic.
- a. ***Sports with Six Classifications:*** 1A and 2A may be in the same region or cross-scheduled to create a reasonable schedule, 2A and 3A may be in the same region or cross-scheduled to create a reasonable schedule, 3A and 4A may be in the same region or cross-scheduled to create a reasonable schedule. 4A and 5A may be in the same region or cross-scheduled to create a reasonable schedule.
  - b. ***Sports with Four Classifications:*** 1A and 2A may be in the same region or cross-scheduled to create a reasonable schedule. 2A and 3A may be in the same region or cross-scheduled to create a reasonable schedule and, 3A and 4A may be in the same region or cross-scheduled to create a reasonable schedule.
  - c. ***Sports with Three Classifications:*** 1A and 2A may be in the same region or cross-scheduled to create a reasonable schedule. 2A and 3A may be in the same region or cross-scheduled to create a reasonable schedule.
  - d. ***Sports with Two Classifications:*** 2A and 3A may be in the same region or cross-scheduled to create a reasonable schedule.
  - e. ***Single classified team in a Region:*** it is never preferable to have only one team of a classification in a Region with teams of another classification. There does exist the possibility where given a circumstance of extreme geographical consideration, the placement of a single classified team in a Region may occur. For example: There is only one single 1A team in a given sport in northern Erie county where the only other 1A teams are in southern Mercer County. That single 1A team in Erie County may end up being a single classified team with 2A teams in a Region in Erie County.
