

PERMITTING

Generic Plans \$150.00
As Built Plans \$200.00

Counties Requiring As Built Plans

As Built Plans take a MINIMUM of 4-6 weeks and in some areas could exceed 6 weeks.

City of Tampa

City of Destin

Pasco County – all pages require stamps

Volusia

St. Lucie

Martin County

Brevard County and All City Municipalities

Lee County and All City Municipalities

Palm Beach County and All City Municipalities

***Palm Beach County requires an upgrade to Over165 mph certification due to the high wind loads in the area. Our engineer only draws units in Palm Beach county on 4' centers, and during a final inspection, units that are 150 mph certified will fail. Units that are to be installed on agricultural property or customers that do not plan to permit the structure will not be required to upgrade to 165 mph certification, but make them aware if they receive a citation after the fact, they would be responsible for costs associated with the upgrade. Generally this would involve installation of an entirely new unit, and the customer would not be reimbursed for the original structure.

TO PRICE FOR PALM BEACH COUNTY USE THE 165 MPH Pricing

*** Collier County/ Charlotte County** – If the building square footage exceeds 720 square feet ALL components must be High Impact and the building must meet the over 165 MPH pricing
