LAB Receive Grant from The Lawrence Saunders Fund

Philadelphia, 10 November 2019: LAB received a \$2000 Grant from the Lawrence Saunders Fund. Support from the Lawrence Saunders Fund will enabled LAB to further fine tune is Social Emotional Learning curriculum and expand its reach to a second school.

LAB, established in 2017, runs after school programming focused on increasing opportunities for underserved and at risk youth. Their programs aim to improve academic performance, and enhance social and emotional skills and attitudes, while at the same time demonstrating the importance of community engagement.

This grant from the Saunders Foundation will allow LAB to reach more children using their unique methodology and four pillar curriculum that acknowledges the advantages of both classroom and sports based strategies to build social emotional competence and increase academic performance and combines them both.

LAB is incredibly grateful for the support it received from the Lawrence Saunders Fund, however additional support is needed for LAB to reach its goals and continue to improve the social emotional competence of Philadelphia's underserved and at risk youth.
