START WITH OUR COMPLIANCE + SECURITY PLAN

Compliance and Security plan services include security and privacy controls to protect attorney-client confidentiality and help to support client industry regulations including finance and healthcare.

Hosted Exchange

Get business-grade, fully mobile email, calendar and contacts for your attorneys and staff.

Advanced email security

Tools that help you eliminate spam and viruses before they reach your users' inboxes. Includes advanced spam and virus protection, company-wide white and black lists, and 24/7 threat monitoring

ConnectID single sign-on and identity management

Provide secure, easy-to-manage access to your web-based calendaring and docketing, conflict checking, document management and legal research applications. Secure your cloud apps with 2FA, the strongest industry-standard authentication protocol.

PC Backup

Make sure your staff can recover quickly from hard drive failures and lost or stolen laptops.

Encrypted Email

Protect against data leaks by automatically encrypting email containing privileged client information. Enforce compliance based on policies and rules that you define.

Email Archiving

Archive your email correspondence automatically and securely with encryption. Get tamper-proof, searchable records for auditing, compliance and internal governance purposes.

ShareSync file sync and share

Access and collaborate securely on discovery, client and project files from anywhere, on any device, with at-rest and in-transit encryption. Manage research and discovery files and folders for staff and clients with strict access controls, even in a virtual office environment.

ADD THESE SERVICES TO ENHANCE YOUR SOLUTION

Hosted PBX

Experience enterprise-grade phone service with conference calling and automatic call forwarding. Use the softphone mobile app to dial from a mobile device as if you were sitting at your desk.

ShareSync 10GB Capacity

With upgraded capacity, don't worry about running out of room, whether you're gathering lots of large documents for discovery or maintaining a large library of research or case files.

Skype® for Business Enterprise

Instantly convert a chat into a conversation or video for richer, more productive project discussions. Share screens to collaborate quickly on proposals.

SECURITY AND RELIABILITY THAT GOES ABOVE AND BEYOND THE COMPETITION

Privacy and security to support confidential attorney-client communications.

- Annual SOC 2 Type II audits
- A dedicated, full-time security staff certified in information security
- Full coverage of all aspects of security, including log and event monitoring, incident response, managing intrusion protection systems (both host and network), perimeter defense, service and architecture testing, and source code reviews.

Reliability and support you can count on.

- With InfoTechnovation's 99.999% uptime guarantee, you can access your cloud services when needed, staying connected and productive.
- Receive 24/7 phone and chat support any time you need expert help.

Admin tools to streamline IT management and security.

- Centralized control over users and services and granular configurability.
- Admins can quickly provision, de-provision and configure security controls, and also delegate setup and management to non-specialized staff.
- Single sign-on technology that comes with all InfoTechnovation applications safeguards sensitive financial and customer data and web-based applications.

Mobile device management and security.

- Purposefully built to protect data wherever it is accessed.
- Our email system includes mobile security controls and policy enforcement for the admin including remote wipe for employees with mobile devices.
