

Private Cloud

Customize cloud security and get greater flexibility to integrate.

- Deploy office cloud services in a single-tenant environment
- Private cloud for Exchange, Skype for Business, SecuriSync and more
- Customize the security of your cloud and give you greater flexibility to integrate
- Add multiple data replication options to ease disaster recovery

Private Cloud: Customized Security – Easy integration

A Private Cloud offers an isolated cloud-based environment that is built for your custom IT requirements. Because you're the sole tenant, you have the freedom to customize it around your unique IT needs.

And Private Cloud is backed by 99.999% SLA and enterprise-grade security. We also include premium 24/7 support and a dedicated Technical Account Manager to help you get the most out of your Private Cloud and other Infotechnovation services.

Integrate your existing apps with Private Cloud, including:

- Backup
- Mobile Device Management
- Custom SharePoint installations
- Unified Messaging systems
- Content Archiving systems

Customize your Private Cloud to fit your business needs:

- IP-address restrictions
- IPsec VPN connectivity
- MPLS/peering available
- In-line security appliances
- Collocated equipment
- Customized tape rotation
- And more
