

Why Join NTMA?

Manufacturing America's Future

MEMBER BENEFITS

NETWORKING

Our members report that much of the value of their participation with NTMA comes from what they derive from peers. NTMA offers no shortage of Chapter gatherings and national conferences that provide opportunities to meet and learn from your peers and emerging leaders.

WORKFORCE DEVELOPMENT

NTMA is working to attract the next generation to the manufacturing industry through an innovative suite of programs that build manufacturing interest and awareness. These programs include the National Robotics League, NTMA-U educational training and apprenticeship programs, NIMS benchmark standards for training, and the Mechanical Aptitude Test benchmark for workforce development and training. These programs are certified and nationally recognized by the FBAT- DOL, and carry 21 articulated college credits towards an Advanced Mechanical Engineering Degree. The purpose of these programs is to supply the small-to-mid-size manufacturer with sharp, young, enthusiastic talent.

BUSINESS DEVELOPMENT

We organize regular business-to-business Supplier Chain Networks and Technical Seminars, including roundtables and workshops, giving you access to industry leaders, new ideas, and the opportunity to spread your brand. NTMA also offers a Manufacturing Suppliers Guide that allows members to customize a company profile and showcase their capabilities. Members also get access to the NTMA Business Conditions Report containing periodic survey results gathered from contract manufacturing companies broken down by industry segment and geographic regions. Additional benefits include free legal council, and HR and employment law resources and documents.

DECISION RESOURCES

NTMA offers annual comprehensive wage and salary surveys and benchmarking resources, including an executive compensation report. Through your membership, you also have access to legal counsel on labor relations matters with free-of-charge consultations, as well as NTMA's BLR online safety resource center with safety information and downloadable materials. Members can also take advantage of the NTMA Business Insurance Program, which provides tailored coverage to meet the specific needs of the manufacturing industry.

DISCOUNTS

Leverage the power of your NTMA membership by taking advantage of member-only discounts, covering everything from conferencing and payroll services to shipping and office supplies. The NTMA Grainger program also offers discounts on perishable tooling, safety and other production-oriented supplies.

ADVOCACY

NTMA is committed to representing our industry's needs before Congress and the Administration. As part of One Voice – the federal government advocacy program representing small and medium sized manufacturing businesses in America with a total of roughly 1,400 member manufacturing companies – NTMA speaks for manufacturing, fights for fair trade and sensible regulation, and acts to keep economic activity in America. We also understand the need for skilled labor in the industry, and work to recruit and teach new talent to manufacturing through initiatives and programs like the National Robotics League.

CHAPTERS

Since its foundation in 1943, NTMA has remained relevant by changing with the times, focusing on the future of American manufacturing as exemplified by our members: small and medium-sized companies, many of them family owned or privately held.

NTMA has the know-how, resources, and national presence to effectuate positive change and growth. Our growing membership is gaining momentum and bringing a new perception to precision manufacturing across the U.S.

NATIONAL TOOLING AND MACHINING ASSOCIATION

1357 Rockside Rd.
Cleveland, OH 44134

Regularly, at a conference or just an informal gathering, or I hear something at an industry roundtable, and I'll get an idea that adds to my bottom line.
