

Revenue Control *Systems Inc.*

Access Control &
Automation
Design, Development
& Support

Great Customer Service. Great Support.

Whether you need help installing, servicing, or using your RCS access system, we are always available to help you. With over 30 years in the access control industry we know how difficult it can be to get immediate technical help from large companies. We strive to have the best and fastest tech support so that you can solve your problems before they affect your business.

Revenue Control Systems may be a smaller national company, but this allows us to build strong customer relationships based on trust and support. Our company is built on support and our main goal is producing products that will satisfy our customers. Our vision is to help make your day to day operations hassle free and problem free.

Thinking about upgrading your access system? Check out our website for demonstrations, pictures, specifications, and more. Or feel free to call us directly and we can answer any questions you have.

Tips and Tricks: To test your camera system, periodically search and save video to a disk. This will test the system for proper functionality and make sure you are comfortable with how it is done. Also check the connections in the back of your DVR, make sure when you move the DVR the camera pictures don't shake or disappear. Be sure there is nothing piled on top of your DVR, this can affect performance.
