Codice! Revenue Control Systems Gate Access App

Our easy to use gate access app, *Codice!*, is now available!

This app is customizable for any facility allowing your customers to have easy access to your website, online payment, and anything else you choose directly from our app.

Available for both Android and Apple devices, this app has a simple user interface where your customers can gain access to a facility with a click of a button. No need to roll down a window.

Setup is quick, easy, and secure. Only customers with a location specific activation code, given to them by the facility manager, will be able to gain access to that facility. Location services on each phone are used to be sure that the customer is close to the gate to ensure the gate will only open when the customer is present at that location.

Keep your customers happy with the most up to date technology.

REMINDER:

If you have a discontinued keypad system that is in need of being replaced we've got you covered! RCS keypad systems are easy to retrofit into existing locations using existing wires. Saving you time, money, and stress.

Tips and Tricks: If you have a lift gate, it is a good idea to order some extra springs to have in stock in case of emergency. Also make sure the gate operator cover is securely attached to the gate operator. This will help avoid debris getting into the operator. It's good to keep your lawn maintenance staff away from the gate operator as well. They may blow dirt and debris into the unit that could affect performance.
