Access Control &
Automation
Design, Development
& Support

**Increase your facility's security
with a few easy steps:**

- Keep spare gate parts on hand for quick repairs. For lift gates keep spare springs, a high current battery charger and a replacement reflector for the photo eye. For slide gates keep replacement backup batteries and master link for the chain.
- Be sure your access control / gate equipment is easily accessible for service. Cut away any shrubbery around electrical boxes and keep them identified on a site map.
- Check the views covered by your cameras, optimize coverage by keeping sky and trees out of view and focus on your facility. Also periodically check that your DVR is recording and that you know how to play back video.

Codice! Gate Access App is available!

Let your customers enter their gate code from their phone and access the facility.

Customizable app: allow your customers to pay their bill, visit your website, or anything else you choose.

Managers can open the gate remotely, view transactions, and search the activity log from their phone.

Available for android and Apple devices.

REMINDER:

If you have a discontinued keypad system that is in need of being replaced we've got you covered! RCS keypad systems are easy to retrofit into existing locations using existing wires.

Saving you time, money, and stress.

Tips and Tricks: Periodically check the display on your keypads to make sure they are readable in sunlight and at night. Also check for wobble in the keypad pedestals and have it tightened up before it gets worse. Check that the concrete is not damaged or loose in the ground. Have it repaired immediately as this may cause damage to the wires inside.
