Introducing the newest products from Revenue Control Systems

Visit our Website

RCS ON-SITE Access Control

The ON-SITE Access Control System is Revenue Control Systems "on-line" wired system. Currently installed and supported throughout the United States, ON-SITE provides access control solutions for any gated facility.

[Click for more information on ON-SITE](#)

RCS U-FLASH Access Control

U-FLASH is a new and innovative way manage access to remote locations without wires. The U-FLASH Unit is updated via USB flash disk and provides hassle free management of your remote locations.

[Click for more information on U-FLASH](#)

Both of these RCS Access Control Units is accompanied by KPControl, the software that logs all user information and transactions. This easy to use interface allows management of all users and can be connected to popular third-party management software.

Tips and Tricks: Purchase asphalt or concrete crack sealant at any Home Improvement store to repair any cracks in your gate safety loops. Call us with any questions.
