### WSC Continues to Serve in Baltimore Area

Water Safety Consulting & Pool Management LLC is now in the midst of its fifth season serving the Baltimore Metro area after over 10 years serving clients in NJ. As we continue to grow our reach within a 3 state radius, we never lose sight of our mission which is to “Ensure Safety, Provide High Levels of Customer Service, and Maintain Facility Quality”.

We strive to keep the pricing of our lifesaving courses affordable. It is critical to encourage all those we meet to consider taking a lifesaving class. The statistics are astounding—88% of cardiac arrests occur at home yet, fewer than 1 in 5 US adults have CPR training. Think of it this way..... CPR provided immediately after cardiac arrest can double or triple the victim’s chance of survival. Yet, only 32% of victims receive CPR from a by-stander or family member.

#### Training is vital!

### Pool Safety for Every Parent

#### 5 Steps for Pool Safety Over the Summer

1. Always watch children in and around the water. Designate an adult as the “Water Watcher”
2. Teach kids to swim
3. Teach kids to stay away from drains and make sure drain covers are VGB compliant
4. Make sure your pool has layers of protection: 4-sided fence, self-closing self-latching gate, alarms, and a proper cover.
5. LEARN CPR and First Aid!

### New Lifeguards Certified

A little over a month ago the final group of seasonal lifeguards completed their training prior to being assigned to a pool for the summer season. Our trainees ranged in age from 15 to 25 this season. While some were new to water safety, others are seasoned lifeguards having worked in waterparks, pools, lakes, and even the beaches of MD and NJ.

Their training included lifeguarding skills and how to apply and modify those skills to lifeguarding traditional pools. Training included the material from the standard Lifeguard Training course and teaches professionalism, patron and facility surveillance, rescue techniques with a variety of equipment, emergency preparedness and response, and more.
