WSC Continues to Grow

American Red Cross

Proud Provider of American Red Cross
Health & Safety Trainings

Water Safety Consulting & Pool Management LLC is now offering American Red Cross and American Heart Association certification classes in all Health & Safety disciplines **throughout the continental United States**. Many of our courses are available in the Blended Learning format which allows participants to complete a large portion of the class at their pace using our online learning platform. This is followed by an in-person hands-on skills session with one of our instructors. Upon successful completion, participants are issued a 2-year certification card from the American Red Cross or American Heart Association.

We have an established network of instructors in each state who are available to complete your in-person skills session. We are proudly partnered and working with 3 large nationwide companies to certify their employees across the country. We are happy to be providing quality and affordable training to so many across the country!

Training is vital!

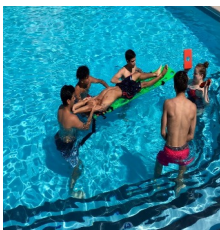

CPR/AED/First Aid Training for Child Care Providers

Whether you are a babysitter, teacher, or child care provider, the importance of high quality CPR/AED/First Aid training cannot be over-emphasized. Providing emergency care to children requires specific skills that go beyond techniques used for Adult CPR. As a professional child care provider, parents and guardians expect and deserve that you will protect their children while under your care and supervision. As you are acutely aware, children are curious by nature and this makes emergencies more likely. Our CPR/AED/First Aid courses will equip you with the knowledge and skills necessary to effectively respond during an emergency. All of our classes are **OSHA compliant and meet the standards for child care worker licensing in all 50 states**.

New Lifeguards Certified

This weekend will mark the conclusion of 3 **Water Safety Consulting & Pool Management** Lifeguarding courses in the Baltimore Metro area. Our trainees range in age from 15 to 25 for these courses and some will work this summer at one of the pools we manage while others will go off and lifeguard at the pool on their college's campus this winter. No matter the pool in which they will be working, we know that these 21 people are well trained and competent.

Their training included lifeguarding skills and how to apply and modify those skills to lifeguarding traditional pools. Training included the material from the standard Lifeguard Training course and teaches professionalism, patron and facility surveillance, rescue techniques with a variety of equipment, emergency preparedness and response, and more.
