CONSORTIUM OF UNIVERSITIES FOR GLOBAL HEALTH

9TH ANNUAL GLOBAL HEALTH CONFERENCE

HEALTH DISPARITIES: A TIME FOR ACTION

NEW YORK, NY  MARCH 16 - 18, 2018  SPECIAL SATELITE SESSIONS: MARCH 15, 2018

#CUGH2018  |  @CUGHNEWS  |  WWW.CUGH.ORG
CGH helps reduce the global burden of cancer by strengthening research capacity through funding and training. Below you will find the most recent funding opportunities that are relevant to our work.

Clinical and Epidemiological Research on Chronic Disease in the Caribbean (R01)
The National Cancer Institute, in coordination with the National Institute on Minority Health and Health Disparities; the National Heart, Lung, and Blood Institute; the National Institute on Aging; and the National Institute of Nursing Research, have announced the Clinical and Epidemiological Research on Chronic Disease in the Caribbean funding opportunity to support U.S.-Caribbean collaborative research to develop or extend cohort or surveillance studies on chronic disease in the Caribbean region, aligned with existing, publicly available U.S. datasets. The intent is for these cohorts or datasets to be used for ongoing, comparative research to better understand the health of Caribbean immigrant populations in the U.S. [https://grants.nih.gov/grants/guide/pa-files/PAR-17-470.html](https://grants.nih.gov/grants/guide/pa-files/PAR-17-470.html)

Cancer Moonshot℠ Funding Opportunities
These funding opportunities highlight research initiatives that align with the efforts of the Cancer Moonshot. Supported with existing or 21st Century Cures Act funds, featured announcements include open funding opportunities.

In response to recommendations in the Blue-Ribbon Panel (BRP) report, new, longer-term Cancer Moonshot-related research funding opportunities are being developed under nine scientific areas that directly address the goals of the Cancer Moonshot. The new funding opportunities will be announced in the coming months. Read more about the scientific areas of research, and sign up to receive automatic updates on the Cancer Moonshot funding opportunities as they become available. Please note that some Moonshot initiatives have expired, but not all. [https://www.cancer.gov/research/key-initiatives/moonshot-cancer-initiative/funding#current](https://www.cancer.gov/research/key-initiatives/moonshot-cancer-initiative/funding#current)

NIH Support for Conferences and Scientific Meetings (R13)
The purpose of this Notice is to clarify that various cancer-related topics for conferences and scientific meetings that are appropriate for PA-16-294 include topics that are relevant to the scientific mission of the NCI’s Center for Global Health, which is to help reduce the global burden of cancer. [https://grants.nih.gov/grants/guide/notice-files/NOT-CA-16-070.html](https://grants.nih.gov/grants/guide/notice-files/NOT-CA-16-070.html)

Please note this is not an exhaustive list of all funding opportunities offered through the National Institutes of Health. For more information, please visit [http://grants.nih.gov/grants/guide/index.html](http://grants.nih.gov/grants/guide/index.html). For funding opportunities available through the National Cancer Institute, Center for Global Health, please visit [https://www.cancer.gov/about-nci/organization/cgh/research-training](https://www.cancer.gov/about-nci/organization/cgh/research-training).
Welcome Message from the Conference Chairs

Dear Colleagues,

On behalf of this year’s host institutions, welcome to the Consortium of Universities for Global Health’s (CUGH) 9th Annual Conference. We hope you will find this a dynamic opportunity to learn, network and collaborate with fellow global health professionals from around the world.

CUGH’s goal for the meeting is to convene researchers, students, implementers and leaders from academia, NGOs, think tanks, the private sector and government to address the compelling global challenges we face. Over 1,800 individuals from an array of fields including medicine, nursing, public health, veterinary sciences, engineering, business, law, dentistry, public policy, urban planning, natural sciences, and environmental studies are in attendance.

This year’s theme, Health Disparities: A Time for Action, examines the extreme inequalities that are contributing to socioeconomic instability and what we can do to address them. The sub-themes: planetary health- One Health-environmental health; governance and health systems; infectious diseases; non-communicable diseases; and the social determinants of health, provide continuity with our prior conferences. The 16 satellite sessions and Pulitzer-CUGH Global Health Film Festival on March 15, along with over 52 conference sessions and 600 abstracts are a showcase of global health innovation.

We would like to give our heartfelt gratitude to the volunteers, reviewers, and the staff at CUGH’s Secretariat, Columbia University and MSI who worked tirelessly to make this event happen. We would also like to thank the sponsors and vendors for your generous support which is vital to the success of the conference.

Thank you again for attending CUGH 2018. Your presence at our meeting means a great deal to us all.

Sincerely,

Wafaa El Sadr, MD, MPH, MPA (Chair)

Welcome Message from the Chair, CUGH Board of Directors

Dear Colleagues,

On behalf of CUGH's Board of Directors, I am delighted to welcome you to our ninth annual global health conference. This year’s theme, Health Disparities: A Time for Action, was chosen to draw attention to one of the great challenges of our time: extreme inequality. A growing problem in much of the world, inequality threatens to undermine the hard-won development successes achieved so far and is an obstacle to the attainment of the UN's Sustainable Development Goals.

CUGH operates across research, education, service, and advocacy. We not only work to strengthen academic global health programs, but we are also a platform to mobilize academia, NGOs, government, and the private sector to identify solutions that policymakers can support to address global health challenges like extreme inequality. We hope you will find our conference useful in sharing your research, learning from others, and developing new professional collaborations.

A great deal of work goes into putting on these events. I would like to thank the conference chairs Dr. Wafaa El Sadr and Dr. Richard Deckelbaum from Columbia University, Dr. Jimmy Volmink and Dr. Hester Klopper from Stellenbosch University, and Dr. Samath Dharmaratne from the University of Peradeniya, as well as conference co-chair and CUGH Executive Director Dr. Keith Martin. They were greatly assisted by the 18 members of the local organizing committee, who collectively helped create the conference program.

We are also extremely grateful to all the volunteers and reviewers. Importantly, I would like to thank Karen Lam, Program Manager, Conference & Events, Dalal Najjar, Deputy Director, and Arisa Koyama, Administrative Assistant, at CUGH's Secretariat, Alberto Mejia and Melissa Reyes at Columbia University, and Doris Steinbach and Norman Stein at MSI, for their dedicated work.

Finally, I extend our deepest gratitude to our sponsors. Your generosity enables us to keep our registration fees relatively low and provides some travel scholarships for presenters from low- and middle-income countries. This assists us in making our conference as affordable and inclusive as possible.

Best wishes,

Pierre Buekens, MD
Cancer Screening in the Developing World
Case Studies and Strategies from the Field
Edited by Madelon L. Finkel, PhD

Case studies featuring real-world issues, problems, and solutions for cancer-screening programs in the developing world

This book represents a critical addition to the literature of global health studies. Focusing on cervical, breast, and oral cancers, these case studies highlight innovative strategies in cancer screening in a diverse array of developing countries. The authors discuss common issues and share how obstacles—medical, economic, legal, social, and psychological—were addressed or overcome in specific settings. Each chapter offers an empirical discussion of the nature and scope of a screening program, the methodology used, and its findings, along with a candid discussion of challenges and limitations and suggestions for future efforts.

MADELON L. FINKEL, PHD, is professor of healthcare policy and research and director of the Office of Global Health Education at Weill Cornell Medicine.

Welcome Message from CUGH’s Executive Director

Dear Friends,

Welcome to CUGH 2018. We are honored that you have come from far and wide to attend our annual conference. We hope that the dynamic, inspiring and informative speakers and issues in the program will exceed your expectations.

Despite living in an age of economic growth, we have also seen a persistent rise in extreme inequality in most countries. This is an economically, socially and politically destabilizing force, yet receives little attention. We chose, “Health Disparities: A Time for Action, as the theme for this year’s conference to reflect the urgency of this threat and convene researchers, leaders, learners and implementers across disciplines and from around the world to share what we can do to address it.

At CUGH we continually work to identify new opportunities to strengthen our global health community’s efforts to educate, share research, advocate and provide service, particularly to disadvantaged communities. This year we: are using an e-poster format to give presenters a more dynamic platform to share their work; created a new track devoted to education; expanded our preconference satellite day which attracted 16, half to full day sessions on a range of global health challenges (including our 6th Annual Global Cancer Day with NIH-NCI & local cancer centers; our 2nd Global Surgery Day & 2nd Building Healthy Cities Satellite; an expanded 5th Annual Pulitzer-CUGH Global Health Film Festival, and more).

I would like to thank our Executive Planning Committee, Local Organizing Committee, CUGH’s Board of Directors, our abstract and awards reviewers, our volunteers, and especially my team at the Secretariat, Dalal Najjar (Deputy Director), Karen Lam (Program Manager, Conference & Events) and Arisa Koyama (Administrative Assistant), Alberto Mejia and Melissa Reyes at Columbia University, and Doris Steinbach and Norman Stein at MSI. This conference would not have occurred without their hard work.

I would also like to express my deepest appreciation to our conference sponsors. Your financial support enables us to keep our registration fees relatively low and in so doing allows us to subsidize attendees from low income countries and all students. We try to do what we can to reduce as many barriers to participating in our activities as possible.

Our conference is a moment in time and we encourage you to engage CUGH (www.cugh.org) as we collaborate across disciplines and distance to address the global health challenges before us to improve the health of people and the planet.

We look forward to seeing you in Chicago, March 7-10, 2019 for our 10th Annual Conference.

Best wishes,

Hon. Keith Martin MD, PC
Executive Director

NIAID needs you because the world needs us!

The National Institute of Allergy and Infectious Diseases (NIAID), a major research component of the National Institutes of Health (NIH) and Department of Health and Human Services (HHS), supports global research on infectious diseases, immunology, allergy, and transplant science to better understand, prevent, diagnose, and treat related illnesses and conditions.

The Office of Global Research (OGR), within the NIAID Office of the Director, focuses on science diplomacy and cultivates global research collaborations. OGR facilitates partnerships across the world and fosters scientific-driven collaborative opportunities. OGR offers fellowships for the next generation of leaders in global research.

Your individual talents could help NIAID achieve its mission.

To learn more about NIAID’s global research efforts, visit https://www.niaid.nih.gov/research/global-research.

Visit the NIAID Booth

If you would like more information about NIAID global research programs or have questions regarding OGR fellowships, please contact NIAIDOGRPPC@niaid.nih.gov.

Visit NIAID Career & Training Opportunities at https://www.niaid.nih.gov/about/careers-training-opportunities to learn more about how you can play a role in this exciting and dynamic research organization.

ABOUT CUGH

The Consortium of Universities for Global Health (CUGH) is a rapidly growing Washington, DC based non-profit consortium of universities, organizations, and individuals from around the world involved in addressing global health challenges. CUGH was established in 2008 with generous funding from the Bill & Melinda Gates Foundation and The Rockefeller Foundation.

MISSION:

To build interdisciplinary collaborations and facilitate the sharing and implementation of knowledge to address global health challenges. CUGH assists members in strengthening their global health programs and sharing their expertise across education, research, advocacy and service. It is dedicated to creating equity and reducing health disparities everywhere. CUGH promotes mutually beneficial, long-term partnerships between universities in resource-rich and resource-poor countries, developing human capital and strengthening institutions' capabilities to address these challenges. It is committed to translating knowledge into action.

VISION:

Making the university a transforming force in global health.

CUGH Activities Include:

IMPACT: Convenes the global health community at its annual conference and other events. Bridges the knowledge-needs gap by increasing access to information and research; facilitating partnerships between academic institutions in high and low-income countries and between them and governments, foundations, NGOs, and the private sector.

ADVOCACY: Engages in public education & advocacy for policies that address global health challenges and in support of issues important to our members.

CAPACITY BUILDING: Provides a mentorship program for global health programs. Helps strengthen education programs in high, middle, and low income countries by connecting trainers and curricula with the training needs of institutions in low resource communities.

EDUCATION: Runs webinars and workshops throughout the year. CUGH.org is a resource center for curricula & other information and services that support global health education, research, and service activities. Identifies the needs of the workforce, and defines competencies and student needs.

RESEARCH: Identifies important research questions, helps strengthen research capabilities amongst members and in institutions in low resource settings.

ENABLING SYSTEMS: Facilitates inter-university information exchanges and develops global operational tools and resources that will strengthen university-based global health programs.

COMMUNICATIONS & INFORMATION RESOURCES:

www.CUGH.org is an information hub for the academic community, policymakers, the public, and the media. It provides an opportunity for members to share information about educational materials, forums, best practices, policy updates, training modules, funding, jobs, grants, research opportunities, and other content across disciplines.

BECOME A DONOR & SUPPORT CUGH

CUGH is a 501c(3) non-profit organization. All donations in the US are tax deductible. You can also donate equities. Your support is much appreciated & helps us fund our programs, support researchers and students from low income countries to attend our conference and expand our services as we strive to address the global health challenges we face.

THANK YOU VERY MUCH FOR YOUR ASSISTANCE!

To donate online go to www.CUGH.org/donate
To donate equities please contact Dalal Najjar, dnajjar@cugh.org
The Fogarty International Center supports research training at all career stages.

THE FOGARTY INTERNATIONAL CENTER

Over the decades, Fogarty’s programs have made significant contributions by filling the pipeline of global health leaders, extending the frontiers of science and accelerating discovery. Above all, Fogarty invests in people—the most important resource in global health research—who serve on the front lines of the fight against diseases that threaten populations in the U.S. and around the world. Fogarty serves as a bridge between NIH and the greater global health community by facilitating exchanges among investigators, providing training opportunities and supporting promising research initiatives in developing countries. Over the last five decades, Fogarty programs have provided significant research training for about 6,000 scientists worldwide.

Health research in the 21st century is increasingly a team effort. Interdisciplinary research groups have been prime movers in the development of low-cost diagnostics and cost-efficient ways to prevent and treat disease. Research groups are best suited to address global health issues when the teams are multinational and sensitive to local culture and context. Building such teams in institutions around the world has been an important Fogarty strategy for decades.

Bridging support is available to enable mid-career scientists, such as Dr. Thomas Gaziano, to advance to the next stage. He received a Fogarty Independent Research Scientist Development Award, which provided a stepping stone to competing successfully for an R01 research grant.
ABOUT CUGH

WANT TO MAKE A DIFFERENCE WITH CUGH?

AFREHEALTH-CUGH WORKING GROUP

AFREhealth-CUGH working group was created as a platform to forge collaborations to strengthen training capabilities in African institutions. Contact: CUGH at info@cugh.org

JOIN CUGH’S EMERGENCY RESPONSE CORPS AND SERVICE CORPS.

Responding rapidly to humanitarian emergencies and building capacity in low resources settings are two of the world’s biggest global health challenges. Chronic human resources deficits and a lack of skilled trainers persist in many areas of the world. To address these problems CUGH created two rosters of professionals with medical and non-medical skills. Our Emergency Response Corps includes professionals interested in helping in a humanitarian emergency. Our Service Corps includes experts prepared to train, build capacity and potentially provide service in a low resource setting. To learn more about this exciting initiative and sign up please see: www.cugh.org/cughrosters

JOIN CUGH’S INTEREST GROUPS & DISCUSSION FORUM

CUGH’s Interest Groups parallel major global health challenges. This is a forum for researchers, implementers, students, and others in the global health community to post good/best practices, training modules, and advocacy issues. It is designed so that individuals from different disciplines can share knowledge, collaborate, and advocate around particular problems. It is designed to help break down barriers between disciplines and facilitate true multidisciplinary collaboration.

Our website also has a Discussion Forum for you to post questions and discuss issues with interested parties. So please join us and use it.

Visit our website at www.cugh.org/join to register as a member and contribute to the site.

Interest Group and Discussion Forum Topics include: Global Health Law, Minority Serving Institutions, Global Oral Health, Global Surgery & Anesthesia, Nutrition and Food Security, Mental Health, etc. To connect to a working group please email us at info@cugh.org

CUGH’S SPEAKERS BUREAU AND EMERGING LEADERS BUREAU

The CUGH Speakers Bureau and Emerging Leader’s Bureau are members-only benefits. It contains a list of speakers that institutions may wish to contact if they are seeking subject matter experts to speak on a topic.

Speakers have been vetted by the CUGH’s Research Committee. CUGH does not offer honoraria or travel reimbursement for members of the Speakers Bureau. Institutions requesting a speaker must engage that speaker directly to make the appropriate arrangements.

To connect to a speaker please email us at info@cugh.org
CUGH Mentorship Program

CUGH’s Global Health Program Advisory Service (GHPAS) connects CUGH member program directors with experienced mentors who can provide guidance as they grow their programs. The mentorship lasts a year. The recommended commitment is a 30-minute telephone meeting every 1-2 months over the course of a year with additional e-mail correspondence as needed.

If you are interested in becoming a mentor or you are a CUGH member trying to start/expand your global health program and would like to use this service, contact us at info@cugh.org

Consortium of Universities for Global Health

CUGH COMMITTEES AND SUBCOMMITTEES

Advocacy and Communications Committee: Chaired by Dr. Keith Martin, CUGH

Education Committee: Chaired by Dr. Quentin Eichbaum, Vanderbilt University, USA

Enabling Systems Committee: Co-Chaired by Dr. Joseph Kolars, University of Michigan, Ann Arbor & Christine Rapalje, Emory University

Finance Committee: Chaired by Dr. Peggy Bentley, University of North Carolina, Chapel Hill, USA

Membership Committee: Chaired by Dr. Muhammad Zaman, Boston University, USA

Research Committee: Co-Chaired by by Dr. Liz Grant University of Edinburgh, Scotland & Dr. Jason Blackard, University of Cincinnati, USA

Subcommittees within the Education Committee:
Education-Related Conference Planning Subcommittee, Educational Products Subcommittee, Global Health Capacity Building Subcommittee, Global Health Competency Subcommittee, Global Health Program Advisory Service Subcommittee, Global Health Undergraduate/Masters Education Subcommittee, Global Health Workforce Subcommittee, and Trainee Advisory Committee.

For information about CUGH’s Committees and Education-related Subcommittees, please contact info@cugh.org

CUGH Campus Representatives

STUDENTS, JOIN OUR CAMPUS NETWORK - CUGH has student campus reps in 51 universities. These reps can share advocacy efforts from their student body with CUGH’s Trainee Advisory Committee and impact the work we do. It is also a way for the reps to mobilize students in their institution to support our advocacy and public education efforts. If you are interested in becoming a campus representative or joining our growing student network, please fill out the following http://goo.gl/forms/yMqYHCHyZ6
General Information

Conference Venue
New York Hilton Midtown
1335 Avenue of the Americas
New York, NY 10019
Phone: 212-586-7000

Registration and Information Booths
Registration and information booths are located in the East Foyer on the 3rd Floor.
Booths Opening Hours are:
Thursday, March 15, 2018
4:00pm – 7:00pm
Friday, March 16, 2018
8:00am – 5:30pm
Saturday, March 17, 2018
8:00am – 5:30pm
Sunday, March 18, 2018
8:00am – 4:00pm

Registration Fees
High Income Countries (HIC)
Delegates (Member): $600
Delegates (Non-Member): $700
Students (Member): $275
Students (Non-Member): $325

Middle Income Countries (MIC)
Delegates & Students (Member): $225
Delegates & Students (Non-Member): $275

Low Income Countries (LIC)
Delegates & Students (Member): $175
Delegates & Students (Non-Member): $225

Welcome Reception
The Welcome Reception will be held on Friday, March 16, 2018, from 6:30pm to 8:00pm at the Americas Hall I and East and West Foyer on the 3rd Floor. A drink ticket is included in each attendee’s registration envelope when you pick up your badge.

Badges
Please wear name badges at all times to gain access to the program sessions and all conference activities.

Speaker Information
An LCD projector and laptop are provided in all session rooms. Speakers should drop off their PowerPoint presentations at least 2 hours before their presentation directly in the session room. A laptop will be provided in each session room. It will not be possible to use another laptop.

Oral Abstract Presentations
Details of the 55 abstracts selected for oral presentation are available in the “Session Agenda” section of this program and the full abstracts are available in the Abstract Booklet provided by The Lancet Global Health.

The 2018 Conference agenda includes 11 oral abstract sessions: one for each conference subtheme plus two sessions featuring the research of Young Scientists under the age of 35, and a new abstracts category “Global Health Education” which highlights new ideas in global health education and pedagogy.

Electronic Poster (ePoster) Presentations – Speed Rounds
ePosters are available for independent viewing all day at the ePoster stations in Americas Hall I every day of the conference, except during the last 1.5 hours of the lunch break on March 16 & 17.

During the lunch breaks of March 16 and 17, there will be speed round ePoster Presentations where ePoster abstract presenters will make presentations of up to 5 minutes each, at their pre-assigned stations, within their pre-assigned half-hour blocks. The list of poster abstracts and their presentation times start on page 68.
ePoster speed round sessions take place Friday, March 16 1:00pm – 2:30pm and on Saturday, March 17 from 1:00pm to 2:30pm. Please attend them if you can and support your colleagues as they share their work.
ePosters are separated into 8 tracks (conference subthemes) plus the new abstracts category “Global Health Education.” The ePoster sessions of the two days also highlight the 27 student/trainee posters that are finalists for CUGH/ Lancet Global Health Best Student Poster Awards. In addition, 10 “Best Undergraduate Abstracts” are also presenting on Day 1.

Conference Evaluation
Please fill out the conference evaluation form available at www.cugh2018.org/evaluation

CME & CNE
To obtain CME and CNE credits, attendees who opted in and paid $30 upon registration are asked to complete the Evaluation and Claim for credit form after the conference closes. See pages 49 and 50 for details.

Coffee Breaks and Lunch
Coffee and snacks are provided mid-mornings and mid-afternoons in Americas Hall 1. Lunch is not provided. However, the New York Hilton-Midtown is conveniently located in a neighborhood with a large number of food options and the hotel has several food outlets.

Conference App and Media
An app for mobile devices with helpful conference-related information, such as the program agenda and speaker bio sketches, is available for use on devices that use the Apple or Android platforms. The app features conference announcements and session updates as well as the ability to mark favorite sessions. Search for CUGH 2018 in the iTunes and Google Play stores. Attendees are encouraged to use the conference app to communicate and share information with other app users.

Visit CUGH’s Facebook page and Twitter handles @CUGHnews and @CUGH_TAC for updates and follow along with conference sessions and commentary on Twitter using #CUGH2018.

Contact CUGH Staff
To contact a CUGH staff member please go to the CUGH booth at the East Foyer on the 3rd Floor.

PURSUE A HEALTHIER WORLD FOR ALL.

As the movement of people, products, pollutants, and lifestyles across borders becomes more common, local health issues increasingly have global consequences. Faculty, students, and staff at the University of Michigan School of Public Health, in close collaboration with our international partners, work in more than 70 countries to build critical public health infrastructure and to implement high-impact and interdisciplinary solutions to our world’s most complex problems. Join us and help us build a future in which the right to public health is achieved in all corners of the world.

5th Annual Pulitzer-CUGH Global Health Film Festival

New York Hilton Hotel-Midtown | Sutton South | 6pm to 8pm

Free and Open to the Public

The Pulitzer Center on Crisis Reporting and CUGH are pleased to present this annual film festival which features a series of outstanding short documentaries on a variety of global challenges by award winning filmmakers and Pulitzer Center journalists. The screening is followed by an audience Q&A with a number of the documentarians.

Global Health Photo Exhibition
March 16 & 17, 2018 | Grand Ballroom Foyer

View the lives and worlds impacted by cultural, environmental and political challenges through the lenses of award winning photographers Andrea Bruce of The Washington Post and Tara Todras-Whitehall, co-founder of Vignette Interactive. Selected photos are available for viewing for two days. Attendees are invited to purchase prints of their favorite photos.
WHAT WE DO

LEVERAGING STANFORD’S STRENGTHS IN INNOVATION AND COLLABORATION.

CLIMATE AND HEALTH
Stanford experts in climate, health, engineering, modeling and design are combining forces in Fiji and Indonesia, where a research team is helping slum communities use green infrastructure to clean their environments and improve health.

PANDEMICS AND BIOSECURITY
Every day, pathogens are mutating and evolving, posing an imminent threat of new outbreaks. At Stanford, modelers and infectious disease experts are combining forces to tackle these challenges.

SCALING AND SYSTEMS
In global health, implementation failures often follow successful pilots. Engaging local governments, communities and business partners demands not only creative solutions but deep cultural and organizational understanding.

CONFLICT ZONES AND REFUGEES
Conflict zones and refugee camps are home to many of the world’s most vulnerable. We’re engaging global policymakers and our projects examine community and tech-based solutions.

GLOBAL MENTAL HEALTH
Mental health issues account for 13% of the global burden of disease, yet in much of the world, treatment is all but nonexistent. Stanford has broadly multidisciplinary teams looking at using tech to amplify human and financial resources.

GENDER EQUITY
The inaugural Women Leaders in Global Health conference at Stanford in October 2017 energized emerging and established leaders from around the globe. Building on this sentinel event, we are launching new efforts to increase gender equity.

MEETINGS, ACTIVITIES & SPECIAL EVENTS

* ALL CONFERENCE ATTENDEES ARE WELCOME TO ATTEND THE FOLLOWING MEETINGS AND EVENTS.

THURSDAY, MARCH 15, 2018

SATELLITE SESSIONS
8:00am – 5:00pm | Various Rooms

Pre-conference satellite sessions are developed and hosted by leading development organizations, CUGH’s committees and member institutions. They are an opportunity to meet leaders addressing a particular challenge, learn, create new collaborations and identify actionable steps to address these issues through half or full day sessions on March 15, 2018. Most sessions are free to attend but do require registration. For more information, www.cugh2018.org/satellites. They are not to be missed.

FULL DAY SESSIONS:

• 2nd ANNUAL GLOBAL SURGERY DAY
• 6th ANNUAL SYMPOSIUM ON GLOBAL CANCER

HALF-DAY AFTERNOON SESSIONS:

• Addressing Sexual Cyber Violence Among Girls and Young Women Globally: Current Trends and Strategies Needed for Prevention
• Happenings and Hot Topics in Global Health Education
• Nursing Leadership in Global Health: Implications for the Future of Nursing Education, Scholarship and Interprofessional Practice
• Outside the Box: Addressing the Sustainable Development Goals through a One Health Approach
• Priority Public Health Research Needs for Enhancing Global Health Security
• Student Global Health Day: Building Advocacy & Communication Skills to Address Health Disparities Around the World

HALF-DAY AFTERNOON SESSIONS:

• AFREhealth and CUGH: Plotting an Actionable Path Forward for Collaborative Partnerships
• Climate Change and Health Priorities for Vulnerable Populations
• Creating Incentives for Greater University Engagement in Global Health Implementation Science
• The Economic Case for Global Health
• The Lancet Global Health Academic Writing Workshop
• Mobilizing Innovation to Eliminate Global Health Disparities

QUALITY, AFFORDABLE PATHOLOGY AND LABORATORY MEDICINES: LAUNCH OF THE LANCET SERIES
5:30pm – 7:00pm | Gramercy

Quality, affordable pathology and laboratory medicine is vital for obtaining a correct diagnosis, for monitoring treatment effectiveness, and for providing disease prognosis. Along with surgical and imaging services, it is an essential backbone of a quality health system, and a key underpinning of Universal Health Coverage. All are welcome to attend this session which is the launch event for a three-paper series in the Lancet. Questions to: nick.wolf@nih.gov

COLUMBIA NURSING-CUGH RECEPTION
6:00pm – 8:00pm | 560 West 168th Street, New York City, 10032 (between Broadway & Audubon Avenue)

A Pan American Health Organization (PAHO/World Health Organization (WHO) Collaborating Center for Advanced Practice Nursing, Columbia Nursing has established global clinical practicum sites for its students and has formed research and programmatic partnerships with institutions across 16 countries in southern and eastern Africa, the eastern Mediterranean, Latin-America, and the Caribbean. Columbia Nursing’s Global Health Program aims to contribute to global health equity by addressing health disparities through service, practice, education, research, and leadership. It looks forward to highlighting a few of their programs and learning about yours. RSVP by March 5: ColumbiaCUGHreception.EventBrite.com

ANNUAL PULITZER-CUGH GLOBAL HEALTH FILM FESTIVAL - OPEN TO THE PUBLIC
6:00pm – 8:00pm | Sutton South

Bring a friend and attend the Pulitzer Center on Crisis Reporting and CUGH Annual Film Festival, which features a series of outstanding short documentaries on a variety of global challenges by award winning filmmakers and Pulitzer Center journalists. The screenings are followed by an audience Q&A with a number of the documentarians. See the film lineup on page 37.

• The Urban Environment and Climate Change
• What You Wish Academia Knew: 20 Years of Employing GH Professionals for USAID
FRIDAY, MARCH 16, 2018
WELCOME RECEPTION (OPEN TO ALL ATTENDEES)
6:30pm – 8:00pm | Americas Hall I & West Promenade Foyer
Enjoy a drink and snacks and meet your fellow attendees and CUGH2018 speakers.

GLOBAL HEALTH PHOTO EXHIBITION
March 16 – 17, 2018 | 10:00am – 6:00pm | Grand Ballroom Foyer
View the lives and worlds impacted by cultural, environmental and political challenges through the lenses of award winning photographers Andrea Bruce of The Washington Post and Tara Todras-Whitehall, co-founder of Vignette Interactive. Together they have amassed a spectacular body of photographic work for institutions such as National Geographic, New York Times, Washington Post, Vanity Fair, Amnesty International, UNICEF, and the International Rescue Committee. Selected photos are available for viewing for two days. Attendees may purchase prints of their favorite photos. www.andreabruce.com/prints/cugh01/

See the 2018 CUGH-Pulitzer Global Health Video Competition Winners
March 16, 2018 – Saturday, March 18, 2018 | All Day | Grand Ballroom Foyer
CUGH and the Pulitzer Center on Crisis Reporting presents the winners of the 2018 Global Health Video Competition. Filmmakers and documentarians were invited to submit short videos of up to 5 minutes, in two categories: Advocacy, and Innovation. One winner and two honorable mentions were selected for each category. The six shorts will be viewable all day March 16 to 18 in the Grand Ballroom Foyer.

ePOSTER VIEWINGS & PRESENTATIONS
View the presentations during Speed Rounds: March 16 & 17, 2018
1pm – 2:30pm | Americas Hall I
In 2018 CUGH leaves behind traditional poster boards in exchange for “electronic posters,” or ePosters. The ePosters will be accessible on site for the 3 days of the conference. On March 16 and 17, poster abstract authors will present their work through a series of “speed rounds” where each ePoster author will present for up to 5 minutes. Attendees are also encouraged to view the abstracts independently either through the 20 ePoster stations on site or via their own web browsers, and to contact the presenters afterwards to further discuss their research. Presentation list on page 68.

GLOBAL HEALTH LAW INTEREST GROUP
1:30pm - 2:30pm | Midtown
CUGH and the O'Neill Institute for National and Global Health Law invite you to attend the inaugural Global Health Law Interest Group meeting at CUGH's 2018 Global Health Conference. The Global Health Law Interest Group meeting is open to any CUGH conference participant interested in the intersections of global health and law, including public health law, health and human rights and global governance for health.

GLOBAL HEALTH LAW INTEREST GROUP
1:30pm - 2:30pm | Midtown
CUGH and the O'Neill Institute for National and Global Health Law invite you to attend the inaugural Global Health Law Interest Group meeting at CUGH's 2018 Global Health Conference. The Global Health Law Interest Group meeting is open to any CUGH conference participant interested in the intersections of global health and law, including public health law, health and human rights and global governance for health.

SATURDAY, MARCH 17, 2018
CUGH BUSINESS & MEMBERSHIP MEETING
8:00am – 8:50am | Grand Ballroom
Learn about CUGH's activities over the last year, its plans for the future and provide feedback to CUGH’s leadership about what it can do to address global health challenges and serve its members.

CUGH AWARDS CEREMONY
12:45 – 1:45pm | Grand Ballroom
Presentations of:
• 2018 CUGH Distinguished Leadership Award
• 2018 CUGH – Velji Awards
• 2018 Lancet – CUGH Best Student Posters
• 2018 CUGH Reflections Essay Contest
• CUGH – JHU Global Health Now | Neglected Issues in Global Health
• Pulitzer-CUGH 5th Annual Global Health Video Competition

CUGH MEMBERSHIP COMMITTEE MEET & GREET
1:30pm – 2:30pm | New York
CUGH members and non-members alike are invited to come meet fellow institutional leaders and CUGH board members to learn how your institution can get involved in CUGH. For more information please email membership@cugh.org

SUNDAY, MARCH 18, 2018
COMMUNICATIONS WORKSHOP: HOW TO TELL YOUR GLOBAL HEALTH STORY (SO PEOPLE HEAR IT)
4:30pm – 6:00pm | Beekman | Hosts: Pulitzer Center on Crisis Reporting & Global Health Now
Immediately following this year's conference on Sunday, March 18, 2018, the Pulitzer Center and Global Health NOW from the Johns Hopkins Bloomberg School of Public Health will lead a workshop on tips and tools you can use to engage the media, the public and policymakers so that your work will be covered and noticed. Journalists and communication specialists, will share with participants the skills they need to effectively pitch a story, translate it to a lay audience, and make both traditional and nontraditional media work for you. This FREE workshop is OPEN TO ALL including the public, but registration is requested. To register, go to http://cugh2018.org/meetings-events
2018 Pulitzer-CUGH Global Health Film Festival

The Pulitzer Center on Crisis Reporting and CUGH are pleased to present a series of 11 outstanding short documentaries by Pulitzer Center journalists and other independent filmmakers and journalists on Thursday, March 15 from 6:00pm to 8:00pm in Sutton South. Some of the documentary filmmakers will be present to discuss their work and how to use visual journalism to impact global health issues. Total Film time is 1 hr. with audience Q&A afterwards.

**Introductions & Moderators:**
Rebeca Kaplan, Mellon/ACLS Public Fellow; Education Specialist, Pulitzer Center
Keith Martin, Executive Director, CUGH

The mission of the Arnhold Institute for Global Health, Icahn School of Medicine at Mount Sinai, is to strengthen community health for all people, no matter where they live.

As a research institute, The Arnhold Institute for Global Health focuses on three areas that are essential to strengthening community health—data science, care models and training.

Our data science work allows decision makers to analyze the information they need to efficiently allocate health resources to save and improve lives.

We collaborate with the Mount Sinai Department of Health System Design and Global Health to create care models that are equitable and effective.

Our training and workforce development programs offer students and residents additional competencies and immersive experiences beyond what is traditionally available in medical curriculum.

As part of the Mount Sinai Health System, The Arnhold Institute partners with global health practitioners across the health system, tapping into their networks and drawing on world-class expertise that enhances our work, and its impact.

We are passionate about ensuring that all of our ideas can be scaled up to reach everyone with the health services they need.

AWARDS & RECOGNITION CEREMONY

Awardees and honorees will be recognized during the annual Awards Ceremony, March 17, 12:45pm to 1:45pm in the Grand Ballroom East/West. All conference attendees are welcome.

“CUGH/Wasserheit Young Leader Award” will be presented immediately before Plenary Session 7, and the “CUGH Hall-Sewankambo Mid-Career Global Health Award” will be presented after Plenary Session 2.

MICHAEL MERSON, MD

Wolfgang Joklik Professor of Global Health
Vice President and Vice Provost for Global Affairs
Duke University

Michael H. Merson, M.D., is the Wolfgang Joklik Professor of Global Health and Vice President and Vice Provost for Global Affairs at Duke University. He joined the Duke faculty in November 2006 as the founding director of the Duke Global Health Institute and served in that role through 2017. In addition, Dr. Merson was Vice Chancellor for Duke-National University of Singapore (NUS) Affairs from 2010 until 2016.

In 1978, he joined the World Health Organization (WHO) as a Medical Officer in the Diarrheal Diseases Control Program. He served as Director of that Program from January 1980 until May 1990. In August 1987, he was also appointed Director of the WHO Acute Respiratory Infections Control Program. In May 1990, he was appointed as Director of the WHO Global Program on AIDS. This Program was operational worldwide and responsible for mobilizing and coordinating the global response to the AIDS pandemic.

In 1995, he joined Yale University School of Medicine as its first Dean of Public Health and as Professor and Chairman of the Department of Epidemiology and Public Health. In 2001, he was named as the Anna M. R. Lauder Professor of Public Health in the Yale University School of Medicine. From 1999-2006, he also served as Director of the Center for Interdisciplinary Research on AIDS at Yale University, which undertakes research on HIV prevention in vulnerable and underserved populations in this country and abroad.

Dr. Merson has authored more than 180 articles, primarily in the area of disease prevention. He is the senior editor of Global Health: Disease, Programs, Systems, and Policies, which is a leading global health textbook in the United States. He recently co-authored the book The AIDS Pandemic: Searching for a Global Response, which examines the 36 year history of the global response to the pandemic. He has served in advisory capacities for UNAIDS, WHO, the Global Fund to Fight AIDS, TB and Malaria, World Bank, World Economic Forum, and the Bill & Melinda Gates Foundation, has two honorary degrees, and is a member of the National Academy of Medicine.
CUGH HALL-SEWANKAMBO MID-CAREER GLOBAL HEALTH AWARD

Recognized Saturday, March 16, 10:45am, Grand Ballroom East / West
–Immediately following Plenary Panel II “Health Disparities: A Time for Action”

HARRIET NUWAGABA-BIRIBONWOHA, MD, PHD

Research Director, ICAP at Columbia University in Swaziland
Assistant Professor, Columbia University Mailman School of Public Health

Dr. Harriet Nuwagaba-Biribonwoha is an Assistant Professor in the Department of Epidemiology at Columbia University Mailman School of Public Health (MSPH). She is a medical doctor and Rhodes Scholar with a PhD in Epidemiology, working as Research Director at ICAP in Swaziland. She is the Principal Investigator for a CDC/PEPFAR award to strengthen national epidemiological and research capacity in Swaziland, including estimation of national HIV incidence among adults and children; and investigator of record for the HIV Prevention Network (HPTN) protocol 084, investigating the role of injectable cabotegravir in HIV prevention. She is the co-investigator with overall local responsibility to provide technical leadership and oversight for multiple research projects in Swaziland, including clinical trials, observational studies, implementation science.

Dr. Nuwagaba-Biribonwoha established the Health Research Training Program (HRTP), a health research mentorship initiative for local healthcare workers in government departments, which has benefited a total of 30 fellows. She regularly hosts MSPH students on international placements. Previously, Dr. Nuwagaba-Biribonwoha coordinated ICAP research and program evaluations in 8 countries in East and Southern Africa. Before ICAP, she coordinated clinical trials for the Medical Research Council Clinical Trials Unit (MRC-CTU) in the United Kingdom and practiced as a medical doctor in Uganda.

CUGH/WASSERHEIT YOUNG LEADER AWARD

Recognized Saturday, March 17, 2:30pm, Grand Ballroom East / West
–Immediately before Plenary Panel VII “The War on Women”

FAITH NAWAGI

Graduate Student, Euclid University
Global Educational Exchanges African Representative, GEMx

Faith Nawagi was born in Uganda. Currently she serves as the African Representative for the Global Educational exchanges in the Medicines and the Health Professions (GEMx) project, a service of the Educational Commission for Foreign Medical Graduates (EDFMG) in Philadelphia. This project aims at building partnerships across the globe to enhance exposure to various health systems for medical and students in other health professions through short elective attachments. Prior to that, she served as a study coordinator at Makerere University- Johns Hopkins research collaboration, for an NIH R01 grant that focused on the Effect of Depo-Provera and Tenofovir on Bone Mineral Density among young HIV positive women.

With a profound interest in research and partnerships, she has won and implemented 06 mini grants and has built partnerships across the globe with a focus on research, academia and global health. She is currently enrolled in a Masters in International Public Health at Euclid University, Global Health Institute. Prior to that, she underwent clinical Epidemiology training at the University of California San Francisco in 2016 and also acquired a Bachelor’s of Science in Nursing at Makerere University’s College of Health Sciences in 2014.
VELJI/CUGH AWARDS FOR GLOBAL HEALTH EXCELLENCE

VELJI YOUNG AFRICAN LEADER AWARD

AMARA FRANCES CHIZOBA
Director of Programs, Mission to Elderlies Project Nigeria

Amara Frances Chizoba is a nurse, researcher and public health specialist. She holds degrees in Bachelor of Nursing Science, Public Health Nursing and a Masters of Public Health. Having observed gaps in care of the elderly in Nigeria and in much of Africa, her passion for the care of the elderly lead her to pioneer the “Mission to Elderlies Project,” an organization that works to provide health care for the underserved aging population in Africa.

During a U.S. visit to study models of care for senior citizens, she recognized a need for culturally sensitive models for care in Africa that are acceptable, accessible and affordable. Engaging a team of 70 health professionals and a council of elders in Nigeria, she developed a geriatric care model currently being reviewed by WHO for adoption for African countries.

Undeterred by a lack of external funding, she took the first step and funded the implementation and evaluation of the community based project across communities in Nigeria; conducting community mobilization and education on healthy aging; providing on the spot health care for the elderly; advocating for the start of geriatric clinics in community hospitals and negotiating the enrollment of elderly persons into national health insurance schemes. According to a Nigeria news agency, this model is ground breaking.

She is the director of Mission to Elderlies Project Nigeria and a program specialist/researcher with Center for Clinical Care and Clinical Research in Nigeria.

VELJI EMERGING LEADER IN GLOBAL HEALTH INNOVATION (STUDENT OR TRAINEE)

MERCY NYAMEWAA ASIEDU
4th Year Doctoral Student, Duke University

Mercy Nyamewaa Asiedu is currently a 4th year PhD candidate in biomedical engineering at Duke University. She spent most of her life in Ghana until college, when she was awarded the Zawadi Africa Education Fund which covered full tuition, fees and expenses to further her education at the University of Rochester, New York.

Growing up in Ghana, she had become aware of the limitations in the health system especially in the area of women’s health, with a lot of issues stemming from limited hospital equipment or existing equipment that, though was suitable for higher income countries, were difficult to utilize in primary and secondary clinics in Ghana. As such, she developed an interest to learn more about medical device development, so she could contribute to developing culturally appropriate medical devices for resource limited regions of the world. After college, she pursued her doctoral studies in biomedical engineering at Duke University, Global Women’s Health Technologies lab. Her current doctoral thesis and innovation focus on: development of a low-cost, speculum-free colposcope for cervical cancer screening; and the development of algorithms for computer-aided diagnoses of cervical precancers. She is also working towards a doctoral certificate in global health and is passionate about using technological innovations to bridge disparities in health between high-income countries and low- and middle-income countries.
NIRMALA RAMANUJAM
Professor of Biomedical Engineering and Global Health
Director of Center for Global Women's Health Technologies
Duke University

Nirmala Ramanujam has over 20 years of experience in optical spectroscopy, modeling light-tissue interaction, translational research and breast and cervical cancer imaging. She is a Professor of Biomedical Engineering, Pharmacology and Global Health and Director of the Center of Global Women’s Health Technologies at Duke University. Her career has been devoted to the development and application of optically based tools for three problems in cancer: assessing hypoxia and metabolism in breast cancer, intra-operative breast margin assessment to detect residual disease, and cervical cancer screening and therapy in resource limited settings. Technology innovations in her research have focused on facilitating investigations in cancer biology in both preclinical and clinical settings, improving the efficacy of clinical cancer therapy and increasing accessibility of point of care cancer screening and treatment options to reduce health disparities in cancer. We have engineered instruments and algorithms to customize these for specific applications in breast and cervical cancer. She collaborates extensively and has led and been co-PI on many funded programs including Bioengineering Research Partnerships and Academic Industry Partnerships. Ramanujam has authored more than 100 peer-reviewed journal articles, 12 book chapter and invited manuscripts, and hold 19 patents.

University of Michigan Medical School
GLOBAL REACH
Research, Education and Collaboration in Health

See how we collaborate at http://globalreach.med.umich.edu.
Dr. Chiratidzo Ellen Ndhlovu has been on faculty at the University of Zimbabwe in the Department of Medicine since 1992. She has risen from a junior lecturer, through senior lecturer and is now an Associate Professor of Medicine, the latter being achieved through her research output especially in HIV and AIDS related activities. She has been the Deputy Dean of the UZ College of Health Sciences (UZCHS) since 2013 and is now serving her second 4-year term. Her focus in medical education has been training medical students at both the undergraduate and postgraduate level in Internal Medicine, Nephrology and HIV Medicine.

She earned her MD as well as specialist training in Internal Medicine in the United Kingdom but chose to return to Zimbabwe to serve her country. She has been a key player in advocacy for the Essential Medicine Program. She has chaired the National Medicine and Therapeutics Policy Advisory Committee (NMTPAC) since 2000 and has coordinated multiple reviews of the national standard treatment guidelines (EDLIZ) as well as the antiretroviral therapy guidelines.

Dr. Ndhlovu has been the Site Director of the University of Vermont College of Medicine Global Health programme with the University of Zimbabwe College of Health Sciences since 2012 and has established multiple exemplary partnerships between the Global North and the Global South. Her international partners have benefited greatly from her leadership, knowledge and generosity. She also had a supportive role in the implementation of MEPI in Zimbabwe in particular in faculty development training and curriculum review activities.

She has devoted her life to working with the public sector and thus has committed her medical life to serving the underserved communities in Zimbabwe.

Jefferson is proud to be a part of the

2018 CUGH Conference
“Better health for all people”

nursing.yale.edu

Educating nurse leaders, scholars & practitioners
Transforming healthcare practice
Advancing science

Yale School of Nursing & the Yale Institute of Global Health congratulate CUGH on its 9th Annual Global Health Conference!

Yale School of Nursing
Awards and Recognitions

Awardees and honorees will be recognized during the annual Awards Ceremony on March 17, 12:45pm to 1:45pm in the Grand Ballroom E/W. All conference participants are welcome to attend.

**REFLECTIONS ESSAYS**

Writings of the three winners and five honorable mentions will be featured in Session CS30 Reflections in Global Health 2018 Essay Contest Reading and Discussion, March 17, 4:30pm to 6:00pm in room Nassau.

**Winner of the Category: Trainees from LMIC/English Not Primary Language**

**Hearing Aid**

_by Parimala Mohanty_, MPH, KITT School of Public Health.

**Winner of the Category: Trainees**

**Carrying On**

_by Hannah Bergbower_, RN, BSN, MPH, MS in Nursing, Nurse-Midwifery and Women’s Health Nurse Practitioner, University of Pennsylvania

**Winner of the Category: Faculty/Practitioner**

**Dignity in Death**

_by Aparna R. Ramanathan_, MD, Assistant Professor, Obstetrics and Gynecology, University of Illinois at Chicago

**Honorable Mentions**

**Food as Medicine: Reflections on Health Care Beyond the Clinic.**

_by Joyce Lu_, National Institutes of Health Post-baccalaureate Fellowship

**Beautiful**

_by Kristen Zozulin_, MD class of 2020, Frank H. Netter MD School of Medicine at Quinnipiac University

**S. Cerevisiae, Platypus, Archaeopteryx or Coelacanth: An Animal Perspective on Global Health**

_by M. Sophia Newman_, MPH, American Medical Association

**Life After**

_by Jeff Walden_, MD, Assistant Professor, UNC Department of Family Medicine

**WamkeleKile eKhayelitsha—Welcome to Khayelitsha**

_by William Kromka_, MD class of 2019, University of Colorado

**“Komera:” The Journey to Dignity**

_by Lauren Thomaier_, MD, Resident Physician, Department of Gynecology and Obstetrics, Johns Hopkins University School of Medicine, Johns Hopkins Hospital

**LANCET/CUGH STUDENT POSTER COMPETITION WINNERS & FINALISTS**

Three abstracts from each of 8 tracks and 1 pathway competed in this competition based on their reviews by CUGH’s scientific committee. These ePosters are listed on the ePoster home screen, and are viewable through the 20 ePoster stations in Americas Hall I and via web browsers. The winners of each category were determined through a scored review in early March, and are identified on the ePoster homepage. Authors are invited to present their findings through the Speed Round poster session of March 16. The winners will be recognized during the Awards Ceremony, Saturday, March 17, 12:45pm to 1:45pm in the Grand Ballroom East/West, where each winner will receive $500 for continuing global health research from The Lancet Global Health.

**CUGH-PULITZER 5TH ANNUAL GLOBAL HEALTH VIDEO COMPETITION**

Communicating clearly and with impact to a broad range of stakeholders is vitally important to attracting attention and support needed to implement solutions to global health challenges. Prose is one way to do this, but a more powerful way is through visual means. In an effort to encourage researchers to express their work in a powerful visual medium CUGH partnered with the Pulitzer Center on Crisis Reporting and developed an annual video competition. Competitors were tasked with the opportunity to convey their work in tight, under five-minute, videos in two categories: Advocacy, and Innovation. A winner and two honorable mentions were selected in each category. The six videos will be shown during the conference and at www.cugh.org
Global Health Innovation

Winner: SOIL Fights Cholera by Transforming Poop into Rich Compost in Haiti – AJ+

Video Description: With 2.4 billion people still lacking access to a toilet, sanitation systems in many countries are broken. This crisis is particularly evident in Haiti, which is home to the highest childhood diarrheal incidence rate in the world and one of the most virulent cholera epidemics in modern history. Many attempts to repair this system have failed, focusing only on the provision of toilets and neglecting waste treatment.

SOIL is changing the story with a paradigm-shifting social business pilot, EkoLakay. This is an ecological sanitation solution that is rapidly gaining traction in Haiti and around the world. SOIL’s EkoLakay service provides over 1,000 families with safe and dignified sanitation all the while producing an endless supply of rich, organic compost critical for agriculture and reforestation. By removing pathogenic waste from the communities we serve, SOIL is transforming a public health problem into an environmental solution and combatting diseases like cholera and typhoid.

Video credits: AJ+

HONORABLE MENTION (INNOVATION): Basanti’s Story: Improving Nutrition through Community-led Video

Video Description: In many of the communities hit hardest by malnutrition, the spread of relevant health information is limited by low penetration of radio and television and low literacy rates. Community video is an innovative approach to not only share information but build efficacy to change nutrition-related behaviors in rural communities. When community members see their neighbors’ lives improved practice through videos made by those in their own community, they are more likely to believe they too can practice them. The videos also serve as an important catalyst for dialogue among mothers, fathers, mother-in-laws and other community members to address barriers to certain behaviors and strengthen an enabling environment for improved nutrition practices. This video features a testimonial from Basanti Mahji, a program beneficiary in Keonjhar, India, discussing the impact the videos from this collaboration have had on her life and the health of her children.

Video credits: Adam Booher, Digital Development Communications and John Nicholson, John Snow, Inc.

Global Health Advocacy

Winner: Community Health Policy Matters

Video Description: APC’s Community Health Policy Matters video tells the story of fictional characters Winnie and Mary, and how a fragmented health system affects each woman’s ability to access family planning services in her respective community. Community-based family planning is an important way of helping to achieve global goals to enable 120 million more women and girls to use contraceptives by 2020. This animated video highlights how policy can improve the health system for women and ultimately advance these larger goals.

Video credits: Developed by Matthew Baek, Kristen Devlin, Tanvi Pandit-Rajani, and Kim Farnham Egan of JSI Research & Training Institute, Inc. (JSI) for the Advancing Partners & Communities (APC) project. APC is a cooperative agreement funded by the U.S. Agency for International Development under Agreement No. AID-OAA-A-12-00047, beginning October 1, 2012. APC is implemented by JSI Research & Training Institute, Inc., in collaboration with FHI 360.
HONORABLE MENTION (Advocacy): Districts Address Anemia with DATA

**Video Description:** Anemia is a serious public health problem with the highest burden in women and young children. It is a complex condition caused by multiple factors which act through interwoven mechanisms, and differ by context. It is critical for policymakers and programmers to understand the anemia situation in their specific context, and to address anemia based on the information and evidence they have. As governments decentralize, it becomes even more important to work at the district level in a multi-sectoral approach that addresses the leading causes of anemia. SPRING developed the District Assessment Tool for Anemia (DATA) to assist countries in strengthening anemia programming at the district level. DATA helps districts determine factors contributing to anemia in their specific setting, identify enablers and barriers to addressing anemia, and prioritize interventions and actions to strengthen anemia-related programming. This video features the implementation of DATA in Nepal and Uganda, focusing on local leaders and stakeholders who participated in DATA district-level workshops and national training of trainers sessions. In the video, leaders speak to the value of the tool for information gathering and intervention prioritization in their specific contexts.

**Video Credits:** Joshua Yospyn on behalf of SPRING with Danya Sarkar and Teemar Fisseha, John Snow Inc.

HONORABLE MENTION (Advocacy): World Vision Kenya Healthy Spacing and Timing of Pregnancies

**Video Description:** World Vision Kenya has been implementing the USAID-funded “Garba Tulla Health Timing and Spacing of Pregnancies/Family Planning (HTSP/FP) project”, under JSI/Advancing Partners & Communities (APC), since March 2014 in Isiolo County, Garba Tulla Sub-county, Kenya. The project aims to increase access to family planning services in the community, increase knowledge and interest in HTSP/FP within communities, and improve the social and policy environment for Family Planning services and positive Reproductive Health behaviors. The Garba Tulla project works hand in hand with the Kenyan Ministry of Health to support the strengthening of the health system both at facility and community levels by targeting five health facilities and over 120 Community Health Workers and facility-based health care providers with HTSP/Family Planning trainings and mentorship. The project strengthens the community-based programming in HTSP/FP as well as advocacy for improved service delivery at local and national levels through selected Community Health Committees (CHC) that are affiliated with Community Units (CU). The project uses two main service entry points, antenatal care and immunization, to increase uptake of HTSP/FP. The Garba Tulla project has also focused on male involvement in the communities by training male Community Health Volunteers, male Faith Leaders (Imams and Sheikhs), teachers, and male partners in HTSP/FP. Due to these efforts, the Garba Tulla community has seen an increase in family planning awareness an uptake in male involvement in the family planning method decision-making process.

Joia S. Mukherjee
Foreword by Paul Farmer

- A practical and essential introduction to the history and delivery of global health, written by one of the field’s most respected physicians
- An ideal course text for undergraduates beginning their study in global health
- Includes real-world cases and exercises that highlight the challenges and opportunities in global health delivery
- Links to open-source Global Health Delivery cases developed by Harvard Medical School and Harvard Business School
- Chapter on activism contains links for students and physicians seeking to get involved in global health
- Details the United Nations’ 2015 Sustainable Development Goals and their implications for global health

Working Together for Disease Eradication
Accreditation Statement
This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of Boston University School of Medicine and the Consortium of Universities for Global Health. Boston University School of Medicine is accredited by the ACCME to provide continuing medical education for physicians. Boston University School of Medicine designates this live activity for a maximum of 18.25 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The Royal College of Physicians and Surgeons of Canada - All live conferences or live courses held outside of Canada can be reported as accredited group learning activities under Section 1 of the MOC Program if they are developed by a university, academy, college, academic institution or physician organization.

Target Audience
The target audience of this activity includes global health professional, teachers, students and other stakeholders representing a diverse array of disciplines and specialties with focus on global health service, education and research.

Educational Objectives
At the conclusion of this conference the participants will be able to:

- Describe the relationship between global health and law and the importance of the law in global health governance to improve health outcomes.
- Develop enhanced understanding about key barriers and drivers of health care workforce development; examine strategies for developing a well skilled multi sectoral health workforce; and examine models for training and retaining workers that effectively support the diverse aspects of patient care.
- Learn how health systems might be revised/improved to meet the health needs of today’s displaced populations; plan global and national governance to meet health workforce goals; and help inform funders and policy makers.
- Gain rich understanding of the conditions of this demographic; learn key components for improving health and social systems to better meet their needs; and learn new research in this field consider conditions associated with ageing and priority areas for action, and to address these challenges from recent research and programs.
- Discuss the lessons learned and best practices for using technologies for human health. Attendees will explore the different models of health technologies designed for resource poor countries. They will gain insights about their implementation, scale-up, and effects on health outcomes.
- Describe the health, social & environmental impacts of climate change; gain the latest insights from multisector partnerships that aim to reduce vulnerability due to climate change; explore different approaches for integrating public health, technology, science, policy to further enhance resilience.
- Determine best practices for developing institutional capacity for research in injury prevention and control.
- Describe the social and structural barriers to the implementation of HIV prevention and treatment in certain regions.

Needs Addressed Statement
There is considerable interest in global health among the health professional schools, students and practitioners. Much of this is driven by the desire to address disparities in health care in low and middle income countries. All too often, the knowledge base underpinning practice and implementation of programs is limited. By making research in global health topics the principal theme of the meeting we will help to identify where knowledge gaps exist and the opportunities to generate better evidence based policies and programs.

Disclosure Policy
Boston University School of Medicine asks all individuals, and their spouses/partners, involved in the development and presentation of Continuing Medical Education (CME) and Continuing Nursing Education (CNE) activities to disclose all relevant financial relationships with commercial interests. This information is disclosed to CME activity participants prior to the start of the educational activity. Boston University School of Medicine has procedures to resolve all conflicts of interest. In addition, faculty members are asked to disclose when any unapproved use of pharmaceuticals and devices is being discussed.

The Planning Committee for this activity included Naomi Moeller, Boston University School of Medicine Office of CME, and Karen Lam of Consortium of Universities for Global Health.

The Course Director and members of the Planning Committee have no relevant financial relationships with ACCME-defined commercial interests.
The faculty members listed below provided the following disclosure information and indication where they plan on discussing unlabeled uses of a commercial product:

Frederick Altice, MD, MA
Faculty has received grant/research support from the Gilead Foundation and is a speaker/consultant for Bristol Myers-Squibb, Clinical Care Options and Gilead Sciences.

David Berry, MD/PhD
Faculty is an employee of Flagship Pioneering and is a founder/stockholder in Axcella, Evelo, Kintai and Seres.

All other faculty members participating in the accredited component of this program have no relevant financial relationships with ACCME-defined commercial interests and do not plan on discussing unlabeled uses of a commercial product. A full list of faculty can be found in the conference guide.

CME COURSE ADVISOR
Muhammad Zaman, PhD, Associate Chair for Undergraduate Studies, Biomedical Engineering, Professor, Biomedical Engineering, Boston University

CME Certificates
All plenary and breakout sessions with the exception of ePosters, oral abstract presentations, satellite sessions and session PS09 are accredited.
To claim credit:
Go to http://bucme.org/getcredit (Note that you cannot claim credit until the program has finished.)
1. Please type in MLN18029 into the search field and press enter
2. Click on “Proceed to credit”
3. Create an account or log in with your user name and password if you already have one.
4. At the next screen, click continue using get credit
5. Follow the online instructions to complete your evaluation, claim your hours and print and/or save your certificate.

For further assistance, please contact the Boston University School of Medicine Office of Continuing Medical Education at cme@bu.edu or (617) 358-5005.

For Physician Assistants:
AAPA accepts category 1 credit from AOACCME, Prescribed credit from AAFP, and AMA PRA Category 1 Credit™ from organizations accredited by the ACCME.

For Nurses:
For the purpose of recertification, the American Nurses Credentialing Center accepts AMA PRA Category 1 Credit™ issued by organizations accredited by the ACCME.

Other Health Care Professionals:
A record of attendance (certificate) will be provided to all other health care professionals for requesting credits in accordance with state boards, specialty societies, or other professional associations.
FRIDAY, MARCH 16, 2018

8:30 am – 9:00 am

WELCOME
Room: Grand Ballroom East / West

Speakers:
Pierre Buekens, CUGH Board Chair
Wafaa El-Sadr, Conference Chair
Samath Dharmaratne, Conference Chair
Jimmy Volmink, Conference Chair
Keith Martin, Executive Director, CUGH

9:00 am – 10:45 am

PS01: PLENARY SESSION
Room: Grand Ballroom East / West

Opening Keynote Address
Stephen Lewis, former UN special envoy for HIV/AIDS, Ambassador to the UN, humanitarian and broadcaster, has been a global leader in improving access to health care for many of the world’s most vulnerable people. His opening address will outline the growing problem of inequality between and within nations, and what we must do to address these challenges. Mr. Lewis is a powerful orator who will challenge attendees and lay the foundation for the next three days of the conference.

Introduction:
Richard Deckelbaum, Conference Chair; Director, Institute of Human Nutrition, Columbia University, USA
Speaker:
Stephen Lewis, Fmr. UN Special Envoy for HIV/AIDS; Co-Director, AIDS-Free World, Canada

9:30 am – 10:45 am

PS02: PLENARY SESSION
Room: Grand Ballroom East / West

Health Disparities: A Time for Action
Disparities across a range of social determinants of health are on the rise between and within nearly every nation. The wealthiest 1% have seen an extraordinary rise in the amount of wealth they control compared to bottom 90%. This has profound, negative, socio-economic and political implications for people’s health and the stability of nations. This panel will delve into the impact these disparities are having on people around the world and what can be done to address them.

Moderator: Jimmy Volmink, Dean, Faculty of Medicine and Health Sciences, Stellenbosch University, South Africa

Strengthening Health Systems and Public Institutions for Humanitarian Crises: Health Workforce and Governance
Crises are unplanned, ubiquitous and unpredictable in duration and effects. Sudden or insidious, they typically precipitate public health epidemics. The global community is experiencing a litany of crises including natural disasters; conflicts; war; genocide; starvation; forced migration; outbreaks of communicable diseases, NCDs and an opioid epidemic. The resource limiting effective response to crises is the health workforce. First to respond, last to depart, crises require sufficient numbers of health workers who are technically skilled and protected. Recognizing the gaps, the Commission on Health Employment and Economic Growth lists humanitarian crises among its recommendations.

Moderator:
Marilyn A DeLuca, Associate Professor, Rory Meyers College of Nursing & Assistant Professor, School of Medicine, New York University; CEO, Global Health-Systems-Philanthropy, USA

Speakers:
Lisa Meadowcroft, Executive Director, ALIMA, USA
Nadia M Cobb, Associate Professor, Director, Office for Promotion of Global Healthcare Equity & Physician Assistant Studies, Department of Family and Preventive Medicine, School of Medicine, University of Utah, USA
Juan Carlos Negrette, Director, Global Health Program, University of Utah, USA
Marilyn A DeLuca, Associate Professor, Roy Meyers College of Nursing; Assistant Professor, School of Medicine New York University; Founder & Consultant, Global Health-Health Systems-Philanthropy, USA

11:15 am – 12:45 pm

CS02: CONCURRENT SESSION
Room: Murray Hill

It Takes a Village: Supporting the Spectrum of Female Leaders in Global Health
Women comprise the majority of the global health workforce yet hold only approximately one-fourth of top global health leadership positions worldwide. This panel discussion will address the importance of female leadership in global
health, with a specific focus on the breadth of global health leadership roles that can be filled by women. Leaders from the fields of nursing, obstetrics and gynecology, surgery, and the NIH Fogarty International Center will discuss challenges specific to these fields both in the US and in international settings.

Moderators:
- Michele Barry, Senior Associate Dean, Global Health, Stanford University, USA
- Jennifer Downs, Assistant Professor of Medicine and Microbiology & Immunology, Department of Medicine, Weill Cornell Medicine, USA

Speakers:
- Rose Molina, Obstetrics and Gynecology, Beth Israel-Deaconess Medical Centre, USA
- Miriam Mutebi, Consultant Breast Surgical Oncologist and Lecturer, Aga Khan University, Nairobi, Kenya
- Nancy Glass, Professor and Associate Dean of Research, Johns Hopkins School of Nursing, USA
- Roger Glass, Director, Fogarty International Center, National Institutes of Health, USA

11:15 am – 12:45 pm
CS03: CONCURRENT SESSION
Room: Beekman
Confronting Water- and Climate Change Related Health Disparities in the Caribbean

Priority environmental health threats facing 18 million, disparate Caribbean racial and ethnic minorities are water contamination, poor air quality, climate change, and a lack of EOH policies. This panel will feature four presentations: 1) the severity, burden of disease, and impact on well-being of EOH policies. This panel will feature four presentations: 2) the severity, burden of disease, and impact on well-being of water insecurity; 2) Ecosystem damage by mercury (Hg), a signature neurotoxicant associated with goldmining and climate change; 3) the impact of Hg exposure through contaminated seafood on vulnerable subpopulations especially during pregnancy and early neurodevelopment; and 4) the disproportionate consequences of climate change especially on vulnerable communities.

Moderator:
- Maureen Lichtveld, Professor and Chair, Department of Global Environmental Health Sciences, Tulane University, School of Public Health and Tropical Medicine, USA

Speakers:
- C. James Hospedales, Executive Director, Caribbean Public Health Agency, Trinidad & Tobago
- Paul Ouboter, Adjunct Professor, Department of Global Environmental Health Sciences, Tulane University School of Public Health and Tropical Medicine, USA
- Jeffrey K. Wickliffe, Associate Professor, Environmental Health Sciences, Tulane University, USA
- Maureen Lichtveld, Professor and Chair, Department of Global Environmental Health Sciences, Tulane University, USA

Practicing to Save Lives: Simulation and Team Training to Manage Obstetric and Neonatal Emergencies in Low Resource Settings

Four-part workshop: Part 1) Update on obstetric and neonatal emergency management | Workshop attendees will participate in a case-based review of the management of obstetric emergencies; Part 2) Review the basics of teamwork and communication; Part 3) Provides attendees with a round robin of highly-realistic simulation scenarios and skills stations that will allow them to practice the clinical pearls and teamwork concepts and participate in a debrief; Part 4) Final discussion, highlighting the key points, lessons learned, and allowing for questions and participant self-reflection of the challenges and possibilities of implementing clinical guidelines, teamwork and communication strategies in their clinical setting.

Speakers:
- Dilsys Walker, Professor, Obstetrics and Gynecology at University of California, San Francisco, United States
- Hannah Park, Deputy Director, Maternal and Neonatal Child Health Cooperative, University of California, San Francisco, USA
- Solange Madriz, Academic Coordinator, University of California, San Francisco, USA
- Heidi Breze-Harris, Executive Director, PRONTO International, USA

11:15 am – 12:45 pm
CS05: CONCURRENT SESSION
Room: Sutton South
Social Entrepreneurship for Health

Social entrepreneurship uses innovation, market orientation, and systems change to drive impact. Social entrepreneurship encompasses a range of tools that can be used to promote health and well-being. For example, the SESH (social entrepreneurship for sexual health) group uses crowdsourcing contests to create more effective and engaging sexual health messages. Crowdsourcing contests have the public respond to an open call for solutions and then share the solutions with the public. This symposium will focus on implementing and evaluating social entrepreneurship projects for health. We will introduce the concept of social entrepreneurship for health, explaining pitfalls and opportunities.

Moderator:
- Joseph D. Tucker, Associate Professor of Medicine, Director of UNC Project-China and Chairman of SESH Global, University of North Carolina, USA

Speakers:
- Alice Zhang, Fourth year medical student, University of Maryland, School of Medicine, Baltimore, USA
- Allison Matthews, Director of the 2BeatHIV Project, Postdoctoral researcher, Department of Social Medicine and the Institute for Global Health and Infectious Disease, University of North Carolina Chapel Hill, USA
- Claire Houlihan, Staff Research Associate, University of California, USA
- Ying Sun, Associate Partner, McKinsey and Company, USA
Pathology: The “Missing Link” in Global Health Care Delivery

Pathology is the “missing link” in global health. Its role in health care delivery has been under-appreciated especially in low resource settings. Coupled with under-resourced and poorly standardized laboratory testing, pathologic diagnosis of diseases has been compromised. Physicians are led to make presumptive diagnoses, wasteful of scarce health care resources. Accurate and timely diagnosis is essential for appropriate treatment regimens for both communicable and non-communicable diseases. This panel will include global health expert pathologists living and working in Africa to discuss the challenges facing pathologists and laboratory specialists in delivering effective diagnostic services.

Moderator:
Quentin Eichbaum, Professor of Pathology, Microbiology and Immunology, Vanderbilt University School of Medicine, USA
Ann Marie Nelson, Professor of Pathology, Duke University, USA

Speakers:
Quentin Eichbaum, Professor of Pathology, Microbiology and Immunology, Vanderbilt University School of Medicine, USA
Timothy Amukele, Assistant Professor of Pathology, Johns Hopkins School of Medicine, USA
Ephata Kaaya, Professor of Pathology and Vice Chancellor, Muhimbili University, Tanzania
Rudo Makunike-Mutasa, Professor and Head, Department of Pathology, University of Zimbabwe, Zimbabwe
Dan Milner, CMO, American Society for Clinical Pathology ASCP, USA

**Overcoming Disparities to Healthy Aging: Winning Strategies**

In older age, the full consequences of health disparities and cumulative disadvantage emerges, in terms of decades earlier disease, multimorbidity, frailty, cognitive decline and disability. Evidence indicates that prevention and health promotion works at every age. Health systems attuned to this can minimize the adverse consequences of aging and maintain autonomy at a lower cost. In combination, there are large opportunities for compressing morbidity into the latest stages of human life, with resolution of health disparities as the target issue. This will improve health outcomes across the lifespan, and thus unlock the opportunities of longevity. This session will discuss the nature of health disparities that emerge in older age, opportunities for prevention, maintaining function, and the importance of healthy aging populations.

**Moderator:**
Linda P. Fried, Dean, Mailman School of Public Health and DeLamar, Columbia University, USA

**Speakers:**
Harvey Brenner, Professor, Health Behavior and Health Systems, University of North Texas Health Science Center, USA
Issbella Aboderin, Senior Research Scientist, African Population and Health Research Institute, Kenya
Luis Miguel Gutierrez, Founding Director, National Institute of Aging, Mexico
Harvey Brenner, Professor, Health Behavior and Health Systems, University of North Texas Health Science Center, USA

---

**Shaping Health Systems to Reduce Disparities**

This plenary will give a comprehensive review of cutting edge approaches to strengthening health systems in low resource settings from financing, supply chain and data to addressing human resources deficits. Each speaker will address a part of this complicated challenge and provide the audience with up to date information they can use.

**Moderator:**
Ayman El-Mohandes, Dean, CUNY School of Public Health, USA
program in responding to the changing ecologies of war and the interdisciplinary efforts of medical and social science research in shaping our understanding of global health problems, including antimicrobial resistance, cancer, and the therapeutic geographies of care across the MENA region.

Translating Research into Action in a Challenged Region: Programs to Stem the Tide of HIV in Eastern Europe and Central Asia

Eastern Europe and Central Asia (EECA) is the only region globally where HIV incidence and mortality is rising. Multiple social and structural barriers to the implementation of HIV prevention and treatment have been identified, including sub-optimally scaled opioid agonist therapies, inadequate harm reduction services, poor retention in care and limited treatment access for comorbidities. Thus, the epidemic is growing in the setting of multiple gaps of translation of evidence-based interventions into cost-effective programs. The NIH funded investigators in this symposium will highlight the unique aspects of the EECA HIV epidemic and the challenges to implementing evidence-based interventions in the region.

Moderator:
Jack A. DeHovitz, Distinguished Service Professor of Medicine, SUNY Downstate Medical Center, USA

Speakers:
Nabila El-Bassel, Professor, Columbia University School of Social Work, USA
Don C. Des Jarlais, Professor of Psychiatry and Preventive Medicine, Icahn School of Medicine at Mt. Sinai; Guest Investigator, Rockefeller University, USA

NIH Fogarty International Center Pathways to Global Health Research Careers: Yesterday, Today and Tomorrow

Since 2004, the Fogarty International Center, with partners at the National Institutes of Health, have supported global health research training for over 1,000 U.S. trainees. The current Global Health Fellows and Scholars Program supports six consortia of U.S. academic institutions to provide mentored research training opportunities at international partner institutions in developing countries with robust clinical research programs. Each consortium includes four U.S. academic institutions and their respective international partner institutions, and offers global health research training in communicable diseases, non-communicable diseases, maternal and child health and One Health. The program is open to U.S. and LMIC pre- and postdoctoral trainees from all health-related disciplines. Alumni of the three programs will discuss their research and training experiences, as well as their career paths.

Moderator:
Joseph Zunt, Professor, Departments of Neurology and Global Health, University of Washington, USA
Benjamin Chi, Professor, Department of Obstetrics and Gynecology, University of North Carolina, Chapel Hill, USA

The Lancet Commission on Pollution & Health: Main Findings and Recommendations for the Future

Pollution is a massive cause of disease, death and environmental degradation. In 2015, pollution was responsible for 9 million deaths – three times more than AIDS, tuberculosis and malaria combined; 92% were in low and middle-income countries. Pollution and pollution-related disease (PRD) are also responsible for enormous economic losses. However, pollution is neglected in global health and international development. To address this overlooked problem, the Lancet Commission on Pollution...
and Health was created. Its goals were to raise awareness of pollution’s magnitude, end the neglect, and mobilize the resources and political will needed to control pollution and prevent premature deaths.

Disparities in Access to Education and Global Health Training and How to Overcome Them Among Minorities in the US

A 2016 report by the U.S. Department of Education states that in order for higher education to remain “a key pathway for social mobility and economic opportunity in the United States”, equitable access to education for underrepresented populations must be a focal area for colleges and universities. Despite efforts by the leading institutions to address diversity and inclusion, there remain notable disparities in educational access to leading US academic institutions for underrepresented or disadvantaged groups. Given the need to address this timely issue in the US, this panel of well-respected scholars and practitioners will discuss the need for equitable access to higher education and the implications of healthcare inequality in the US.

Moderator:

AGAINST: Richard Horton, Editor, The Lancet, UK

9:45 am – 10:30 am
PS06: PLENARY SESSION
Room: Grand Ballroom East / West
Gairdner Panel on Health Disparities Globally
The Gairdner Foundation recognizes the world’s leading biomedical and global health researchers. This lecture will include an intimate discussion with Dr. King Holmes (2013 John Dirks Canada Gairdner Global Health Awardee) who was recognized “for global scientific contributions to the field of sexually transmitted disease and their effective treatment and prevention.” Dr. Holmes will be joined by Dr. Rose Leke and Prof. K. Srinath Reddy (Gairdner Foundation’s Global Health Committee Members). These three individuals will talk about their respective research in a moderated discussion with Dr. Roger Glass about health disparities globally. An audience Q and A will follow.
Introduction:
Sommer Wedlock, Vice President, Gairdner Foundation, Canada

Innovative Mechanisms to Make Careers in Rural and Underserved Settings the Preferential Choice
Worldwide, there is a shortage of healthcare professionals who choose to practice in rural and underserved areas, and this shortage exacerbates issues of access and delivery of high quality care. Recently, several organizations have been developing models to attract and retain high-quality healthcare workers in rural and underserved areas. Panelists from four of these organizations—the Health Equity, Action and Leadership (HEAL) Initiative, Compañeros en Salud, the Indian Health Service, and Africa Health Placements—will share their models’ successes and challenges and discuss pathways toward improving the rural and underserved healthcare workforce.
Moderator:
Madhavi Dandu, Associate Professor of Medicine, Director, MS in Global Health, IGHS, University of California, San Francisco, USA
Speakers:
Robin Goldman, Assistant Director of Curriculum and Mentorship, HEAL Initiative
Jimena Maza, Director of Primary Care, Compañeros en Salud (CES), Mexico
Paul Jung, Director, Division of Health Professions Support, Indian Health Service (IHS), US Public Health Service, USA
Saul Kornik, Chairman and Co-founder of Africa Health Placements (AHP), USA

11:00 am – 12:30 pm
CS18: CONCURRENT SESSION
Room: Murray Hill
This panel will present the findings of the Lancet – O’Neill Institute Commission on Global Health and the Law, which identifies law as an important, but often overlooked, determinant of health and safety. The Commissioners, international experts in health, policy, law, economics, and governance from international organizations, governments, academia, and civil society, have examined the complex interaction between health and law at the global, regional, and national levels. The Commission’s report, which will be published in 2018, aims to present compelling arguments that law is a powerful tool to advance global health.
health and justice. The panel will present the Commission’s recommendations to achieve this goal, including on the role of law in establishing overarching normative guidance on global health and encouraging countries and international bodies to adopt laws that have demonstrated positive impacts on health.

Moderator:
Richard Horton, Editor, The Lancet, UK
Speakers:
Lawrence O. Gostin, Professor, Georgetown University; Faculty Director, O’Neill Institute for National and Global Health Law, USA
John Monahan, Senior Advisor for Global Health to Georgetown University President John J DeGioia, USA

Road Traffic Incidents: Disparities in Pre-Hospital to Hospital Trauma Care

The care of patients who sustain trauma starts at the scene of the incident. The need for and the paucity of this care affect millions of people around the world, especially in low resource areas. In this session, we explore a comprehensive perspective on the approach to one of the most common and deadly forms of trauma in the world today, road traffic incidents.

Moderator:
Catherine deVries, Professor of Surgery, Adjunct Associate Professor of Public Health, University of Utah, USA
Ray Price, Co-Founder and Director, Center for Global Surgery, Clinical Professor, University of Utah, USA
Speakers:
Dan Deckelbaum, Assistant Professor, Divisions of Trauma and General Surgery, McGill University Health Centre, Canada
Samath Dharmaratne, Professor, Department of Community Medicine, University of Peradeniya, Sri Lanka
Mamta Swaroop, Associate Professor of Surgery, Northwestern University Feinberg School of Medicine, USA

Ethical Challenges in Clinical Global Health: Debating Skills and Scope of Practice

Through a structured debate, panelists from the fields of global health ethics will examine the ethical challenges present in direct patient care, short term field experiences, and research conducted by outsiders in resource constrained settings, particularly in those where there is not a critical shortage of health care workers. The panel will address the initial results from an ongoing survey study investigating the demographics and experiences of health care professionals and trainees practicing global health work in resource constrained settings. The discussion will also evaluate existing efforts to prepare volunteers for ethical challenges through predeparture training. Finally, the panel will propose alternative methods of engagement that mitigate neo colonialism, promote bidirectional educational exchange, and emphasize sustainable health care systems.

Moderator:
Ashti Doobay-Persaud, Assistant Professor of Medicine and Associate Director of Global Health Graduate Education, Center for Global Health, Northwestern University’s Feinberg School of Medicine, USA

Building a Pandemic-Ready Workforce: Eight years of Lessons Learned on Strengthening the Global Workforce through University Networks
An effective One Health Workforce has the technical competencies to meet international standards, the multi-sectoral competencies to lead teams and foster coordination across ministries and the institutional support to use their skills optimally. Over the past 8 years One Health University Networks in Africa and Asia have built university-based programs that are training, a One Health Workforce to strengthen country capacity to prevent, detect and respond to infectious disease threats. This panel will review and discuss the successes and lessons from 8 years on the front lines of training a One Health workforce.

Toward Best Practices for Student Field Work in Global Health
This panel will explore strategies for effectively engaging public health students in international fieldwork during their training so that they both learn and contribute to their site’s agenda in a sustainable and meaningful way. Our focus is on practice experiences that address the structural determinants of health in a setting outside a student’s home country, which requires careful and intentional attention to a number of issues including orientation to the social and political context, some understanding of the social determinants of health in a given setting, and cultural awareness and humility. The panel will be relevant for educators and health professionals involved in developing, implementing, and supervising student fieldwork in diverse global settings.

Moderator:
Julie Kornfeld, Vice Dean for Education, Mailman School of Public Health Columbia University, USA

Challenges in Global Health and Aging: Examining the Double-Burden of Communicable and Non-Communicable Diseases in a Growing Population

Our rapidly aging global population poses new public health challenges. Changing demographics, as illustrated by China’s "4:2:1 demographic problem," have created social and health issues that have implications for health care, social support, and economics and require creative solutions. Managing communicable diseases like HIV, influenza and pneumonia, and coping with an upswing in non-communicable diseases such as hypertension and diabetes in the elderly requires awareness of unique aspects of these diseases in this population. In much of Africa, HIV and AIDS have altered family structures, and the increased use of anti-retroviral treatment has allowed people to live longer lives with HIV.

Against the Current: Updates on the Migration Crisis in the Mediterranean

This panel will identify and evaluate health needs, disparities and solutions for migrant population in the Mediterranean Region, including CDs, NCDs and mental health. Migration does not, in itself, constitute a health risk. However, migrant populations have particular health needs, which may differ from those of the native population and may not, therefore, be included in the health plans of the destination country. Migrants also have different customs and lifestyles, which may change as they adapt to a changing situation. Additionally, mental health is one of the most neglected areas in migrant populations. The challenge is to incorporate the health care needs of migrants into national health plans, policies and strategies, taking into account every individual's basic human right to health and health care.

Moderator:
Núria Casamitjana, Professor and Director of Education & Training, Barcelona Institute for Global Health (ISGlobal), University of Barcelona, Spain

Speakers:

AFREHealth and CUGH: Exploring and Consolidating Sustainable Collaborative Opportunities and Structures

At the inaugural meeting of AFREHealth in Accra Ghana in April 2017, AFREHealth and CUGH held several conjoint meetings and panel discussions during which fields of confluent interest in global health education and training were mapped out. A Steering Committee of the AFREHealth-CUGH Working Group (ACWG) was formed to explore such a sustainable collaboration. This panel explores developments in these synergistic areas of interest between AFREHealth and CUGH with the goal of consolidating collaborative structures between the two organizations.

**The Impact of Climate Change and Environmental Degradation on Health Outcomes**

Climate change affects everyone but has a particularly negative impact on the world’s poorest. Extreme weather events, conflict, food insecurity, migration, biodiversity losses and worsening disease patterns attest to these changes which pose an existential threat to humans and indeed many species. This panel of leaders in the field will outline some of the newest science about these problems and present solutions that individuals, communities and countries can adopt to halt the worsening warming of the planet and mitigate against its consequences.

**Ending AIDS: Hope or Hype?**

Dramatic progress has been made in responding to the more than three-decade long global HIV epidemic. More than half of the people living with HIV now have access to life-saving antiretroviral drugs and the number of new HIV infections has continued to decline. These achievements have motivated discussion of the potential to end AIDS. A panel of global health thought leaders will status of the global HIV response, look ahead to potential to end AIDS, with an emphasis on challenges ahead and how to overcome them. Emphasis on the importance of involvement of multiple stakeholders in confronting this threat including community engagement. Lessons learned of relevance to confronting other health threats will be emphasized.

Quality Data for Universal Health Care: Gaps, Perverse Incentives and Solutions

What happens to efforts to improve Universal Health Care when data is weak, distorted, or missing? There are multiple incentives which may impact on the accuracy of health data and subsequent deficits affecting informing appropriate resource allocation, performance assessment and payments for health services. Distortions of health data can occur at different levels in the health system for different purposes to divert funds, to attract additional funds or for personal career advancement. This session will unpack these issues and discuss how we can improve the quality of data: for tracking the implementation of the SDGs, support more effective payment models for UHC, support priority setting, help improve accountability at all levels in a health system and support anti-corruption efforts.

Chronic Emergency: Strengthening Health Systems to Provide Non-Communicable Disease Services to Refugees and Displaced Populations

By end-2016, 66 million people were forcibly displaced worldwide. While relief agencies and health organizations traditionally focus on the provision of shelter, food and water, prevention of infectious diseases, and the treatment of acute illness, today’s displaced people (DP) also need access to a broader range of health services, including services for non-communicable diseases (NCDs). Panelists will discuss findings from an ongoing study on Syrian refugees’ ability to access NCD services in host countries; examine current international governance structures; and share examples of quality health service delivery in the face of growing demand and instability.

Exposing the Burden of Poor Quality: From RMNCH to Surgical Care

Over the past few decades, there have been substantial improvements in access to HIV, TB, maternal health and surgical care globally. Despite these gains, quality of accessed care has remained low. Understanding the burden of poor quality care and its effect on health outcomes is essential for improving health services and reaching ambitious global targets such as the Sustainable Development Goals.

How Can ENSYS Help with Global Operations?

Global health work can often be stymied by administrative challenges such as staffing projects abroad or getting money to the field. CUGH’s Enabling Systems (ENSYS) Committee was established to help with these issues. To ensure ENSYS responsiveness to member needs, we need your input. In this workshop-style session, we will ask participants to share their operational challenges and to offer suggestions on the specific types of ENSYS support (e.g., online toolkits) that would have greatest impact. Whether your global programs are just getting started or are ready to scale up, practitioners, administrators, and students are all welcome to join.

Strengthening Governance and Public Health Institutions

Under-funded and under-capacitated health systems are a challenge the world over. Uncertainty around who is responsible for what health priorities is another challenge, particularly in developing countries, and one exacerbated in countries with weak health systems. All of this poses significant obstacles to development and achieving the SDGs. Good, clear governance at the global and national levels - backed by clear norms, robust mandates and adequate funding are prerequisites to sustainable development. This expert panel will outline some of the governance challenges we face, both at a state and international levels and how the global health community can help to overcome them.

How to Tell Your Global Health Story (So People Hear It) - Free & Open to the Public

Immediately following this year’s CUGH conference closing on Sunday, March 18, 2018, the Pulitzer Center and Global Health NOW from the Johns Hopkins Bloomberg School of Public Health will lead a workshop on tips and tools for engaging the news media. Alongside global health journalists and communications specialists, participants will learn the skills needed to pitch a story, translate to a lay audience, and make both traditional and nontraditional media work for you.

This FREE workshop is open to all, including the public, but registration is requested. To register, go to: http://cugh2018.org/meetings-events

Moderator:
Rebecca Kaplan, Mellon/ACLS Public Fellow, Pulitzer Center on Crisis Reporting
Speakers:
Rebecca Hersher, Journalist, Science Desk, National Public Radio
Allison Shelley, Independent Documentary Photographer and Multimedia Journalist
Poonam Daryani, 2017-2018 Clinical Fellow, Yale Global Health Justice Partnership
Brian Simpson, Editor-in-Chief, Global Health NOW; Editor, Hopkins Bloomberg Public Health
This year, CUGH is pleased to present Electronic Posters, or ePosters. Come out and listen to the Speed Round presentations during the lunch breaks of March 16 and 17. There will not be a Q&A during the presentation period. Attendees are encouraged to engage with the abstract authors during non-presentation times to discuss their projects.

The ePosters are accessible at 20 viewing stations in Americas Hall 1 throughout the three days of the conference. Viewers can also visit the posters from their own browsers by visiting: www.cugh2018.org/ePosters

**CUGH 2018 POSTER PRESENTATIONS**

*Presenters must be at their stations 15 minutes before their start time.*

**LANCET-CUGH BEST STUDENT POSTER FINALISTS**

**Fri 01.01**
**EDU | Station 01 | Group 1 | 1:00 PM - 1:05 PM**
Tackling Global Health Issues through the Largest Medical Exchange Program in the World
Tommaso Ivan Pomerani, Prato, ITALY
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.02**
**EDU | Station 01 | Group 1 | 1:05 PM - 1:10 PM**
Making Connections: The Importance of Cross-Cultural Experiences for Student Nurses
Jayna Rice, Brockville, CANADA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.03**
**EDU | Station 01 | Group 1 | 1:10 PM - 1:15 PM**
Cervical Cancer Screening in Rural Tanzania; A Capacity Building Project
Alexandra Miller, Bethel, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.04**
**LAW | Station 01 | Group 1 | 1:15 PM - 1:20 PM**
Barriers and Opportunities to Employment of People with Psychiatric Disabilities in Africa; a Scoping Review.
Ikenna Ebuenyi, Amsterdam, NETHERLANDS
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.05**
**LAW | Station 01 | Group 1 | 1:20 PM - 1:25 PM**
Experiences of Violence and Community Dynamics in Women Asylum Seekers who have undergone FGM/C
Hazel Lever, New York, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.06**
**LAW | Station 01 | Group 2 | 1:25 PM - 1:30 PM**
Barriers to Receiving Care Among Women Who Have Experienced Gender-based Violence in Afghanistan
Sonya Stokes, New York, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.07**
**GOV | Station 01 | Group 2 | 1:30 PM - 1:35 PM**
Impact of a Haitian Residency Training Program on Child Mortality in Two Hospitals in Port-au-Prince, Haiti: A Retrospective Analysis
Taylor James, Miami, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.08**

Prisons as Drivers of Tuberculosis Transmission in a Brazilian Community: Mathematical Modeling of Control Strategies
Tarub Mabud, Stanford, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.09**
**GOV | Station 01 | Group 2 | 1:40 PM - 1:45 PM**
Feasibility and Experiences of a Rapid Response Team in a Rural Community Hospital in Western Kenya: A Report on the First 76 Patients
Joseph Owuor, Amherst, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.10**
**IMP | Station 01 | Group 2 | 1:45 PM - 1:50 PM**
Understanding Partner Violence and Alcohol Use in Peru: A mixed methods assessment
Haley Carroll, Somerville, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.11**
**IMP | Station 01 | Group 3 | 1:50 PM - 1:55 PM**
Emergency Department Design in Low-Income Countries: Lessons from the Mirebalais Teaching Hospital in Haiti
Kristen Chalmers, Hanover, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.12**
**IMP | Station 01 | Group 3 | 1:55 PM - 2:00 PM**
Cost of Point-of-Care Test Monitoring for HIV Positive Patients on Antiretroviral Therapy
Kate Simeon, Anchorage, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.13**
**NEG | Station 01 | Group 3 | 2:00 PM - 2:05 PM**
Practices, Training, and Perspectives of Traditional Bone Setters in Northern Tanzania
Elizabeth Card, Philadelphia, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.14**
**NEG | Station 01 | Group 3 | 2:05 PM - 2:10 PM**
Qualitative Assessment of Blood Transfusion at a Regional Referral Hospital in Eastern Uganda
Laura Checkley, San Francisco, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

**Fri 01.15**
**NEG | Station 01 | Group 3 | 2:10 PM - 2:15 PM**
Mental Health Knowledge Among General Practitioners Working in Primary Care in the Greater Tunis Area of Tunisia: A Baseline Portrait
Jessica Spagnolo, Montreal, CANADA
* The Lancet-CUGH Best Student Poster Competition

**Fri 02.01**
**NCID | Station 02 | Group 4 | 1:00 PM - 1:05 PM**
Factors Associated with Utilisation of Female Condoms among Female Students of Gulu University
Twineamatsiko Andrew, Kampala, UGANDA
* The Lancet-CUGH Best Student Poster Competition
Fri_02.02
NCID | Station 02 | Group 4 | 1:05 PM - 1:10 PM
Economic Evaluation of the Use of Drones for Tuberculosis Care in Remote Madagascar.
Lulua Bahrainwala, San Francisco, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

Fri_02.03
NCID | Station 02 | Group 4 | 1:10 PM - 1:15 PM
The Influence of Disease Frequency and Cost of Testing in the Routine Screening of Newly Arrived Refugees in the United States
Ashley Trent, Dayton, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

Fri_02.04
PLA | Station 02 | Group 4 | 1:15 PM - 1:20 PM
Exposure to Neighborhood Green Space, Noise and Sleep: Evidence from the Survey of the Health of Wisconsin
Benjamin Johnson, Milwaukee, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

Fri_02.05
PLA | Station 02 | Group 4 | 1:20 PM - 1:25 PM
Higher food insecurity scores associated with depressive symptoms in post-partum women with 4 and 5 month old infants in Malawi
Tiffany Mark, Rochester, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

Fri_02.06
PLA | Station 02 | Group 5 | 1:25 PM - 1:30 PM
Social Life of Policy: Cumulative Impact Legislation in Maryland
Helen Mittmann, College Park, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

Fri_02.07
DISP | Station 02 | Group 5 | 1:30 PM - 1:35 PM
Collaborative Filmmaking in Public Health Research: Findings from Piloting the Method to Explore Traditional Menstrual Practices in Far-West Nepal
Sara Baumann, Pittsburgh, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

Fri_02.08
DISP | Station 02 | Group 5 | 1:35 PM - 1:40 PM
Reducing Sexual Violence and HIV Risk Among Adolescents in South Africa Through Gender- and Developmentally-Tailored Interventions
Ashleigh LoVette, Providence, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

Fri_02.09 (Abstract Withdrawn from Presentations)
DISP | Station 02 | Group 5 | 1:40 PM - 1:45 PM
Knowledge of Caregivers of Children under Five on Adverse Events Following Immunization Influences Uptake of Immunization Services, a Case of Uganda
Dominic Savio Ogwal, Kampala, UGANDA
* The Lancet-CUGH Best Student Poster Competition

Fri_02.10
SDH | Station 02 | Group 5 | 1:45 PM - 1:50 PM
Undernutrition Reduction in Central America, 1995-2014
Bruno Osorio Hernandez, Chicago, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

Fri_02.11
SDH | Station 02 | Group 6 | 1:50 PM - 1:55 PM
Perceptions of Leucorrhea and Barriers to Adequate Treatment among Women of a rural South Asian Himalayan Community
Shobana Ramasamy, Philadelphia, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

Fri_02.12
SDH | Station 02 | Group 6 | 1:55 PM - 2:00 PM
Benjamin Schwarz, Stony Brook, UNITED STATES OF AMERICA
* The Lancet-CUGH Best Student Poster Competition

TOP 10 POSTERS BY UNDERGRADUATE STUDENTS

Fri_02.13
EDU | Station 02 | Group 6 | 2:00 PM - 2:05 PM
Lessons Learned from International Partners: An Evaluation of the UCLA Department of Medicine Global Health Elective in Malawi
Rachel Mernoff, Los Angeles, UNITED STATES OF AMERICA
* * Top 10 Posters by an Undergraduate Student

Fri_02.14
NEG | Station 02 | Group 6 | 2:05 PM - 2:10 PM
Self-Reported Family History of Breast Cancer in a South African Breast Clinic: implications for genetic counseling and breast cancer care in a resource-limited setting
Cindy Xinxin Du, Chicago, UNITED STATES OF AMERICA
* * Top 10 Posters by an Undergraduate Student

Fri_02.15
NCID | Station 02 | Group 6 | 2:10 PM - 2:15 PM
Human Papillomavirus Prevalence, Knowledge, Attitudes, and Practices among Men who have Sex with Men in Liberia
Christopher Reynolds, Boston, UNITED STATES OF AMERICA
* * Top 10 Posters by an Undergraduate Student

Fri_03.01
