Session Organizations

- Harvard School of Dental Medicine, Office of Global and Community Health
- Child Family Health International
- CUGH Global Oral Health Interest Group
- CUGH Education Committee, Competency Sub-committee
- Organization for Tropical Studies
- American Dental Association Foundation

Session Objectives

- 1) Describe the current landscape, including strengths and weaknesses, of various global community engagement models by health care practitioners and trainees.
- 2) Apply the six-phased approach for competency-based global health curriculum development.
- 3) Consider strategies for identifying partners for integrated global health teaching, learning, and practice.
- 4) Assess feasibility obstacles and solutions for developing ethical and sustainable global health learning and practice experiences for health care providers through competency-based programs.
