

LOCAL VENUES WITH ASSISTIVE LISTENING SYSTEMS

Note: If you are in a location, which uses a H/L system (hearing loop/inductive loop system), and you have a telecoil ("T") switch or program in your hearing aid or CI, you will not need a neckloop or any other receiver. Activate your "T" and volume on your hearing device and you're all set.

When using systems other than HLs you will need a neckloop (supplied by the vendor with some systems, bring your own "just in case") and a receiver, supplied by the Venues. Plug the neckloop into the receiver and turn on your telecoil/program ("T") in your hearing device and adjust the volume. *If you have a hearing loss but don't wear hearing aids or your aid/CI doesn't have a "T", the venue should supply the receiver and headset.*

KEY to Abbreviations:

HL/IL, Hearing Loop, use Telecoil (T) in your hearing aid or Cochlear Implant, **or** Use a Receiver with a Headset/Silhouettes/Ear Hooks (Receiver: Supply your own personal unit, or use one supplied by venue)

FM: Frequency Modulated System, Receiver with appropriate frequency needed, use with Telecoil/Headset/Silhouettes/Ear Hooks (Note: Receiver supplied by venue).

IR: Infrared, Receiver required used with Neckloop or use receiver headset combination (receiver supplied by venue)

Interpretype: A system used to communicate between two people each one typing and reading responses on a screen. Usually used at a greeter's desk.

TTY/TDD: A text Telephone, used to make/receive telephone calls through a telephone Relay Service.

CG: Caption Glasses (available at all Regal Entertainment Group theaters with digital projection services) note: although the Caption Glasses are billed as usable with a neckloop/headset, our members have not found that to be true, at least with all glasses.
