# TECHNO SIGNZ

## Other vs. Techno

- Need additional controller or other device to update
- Sign message limited by controller or device options
- Limited by existing message board options
- Wi-Fi or 3G network

**LIMITED**  
**VULNERABLE**  
**HARDER TO USE**

**CUSTOMIZEABLE**  
**MORE RELIABLE**  
**SMARTER**

- Easily update message via smartphone app
- Customize image or message instantly via app
- Various message board options; amber, 7 color and more
- GSM network connection to smartphone app

# TECHNO SIGNZ

## GSM Technology

**Techno Signz's GSM technology allows users to update their DigiTrail Sign reliably and securely (un-hackable). Rain or shine, GSM technology safely delivers the message. The technology also allows users to update the sign from any location.**

# **DIGITRAIL SIGN**

## **Security Features**

**Techno Signz's unit is lockable and has app technology that allows for users to track the GPS location of the sign in real-time. The sign also notifies the user in real-time through the app, if the sign is ever moved from its location. Furthermore, the sign is coupled with the user's phone number, so no one can hack the system without actually stealing the user's phone.**
