Creating digital innovative solutions, using wireless technology with mobile applications. Our firms' focus is on conceiving new ideas, designing the concept, creating the design and then applying the creation.

PROCESS

PRODUCTS

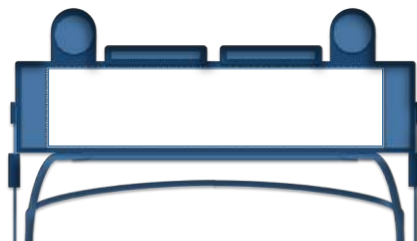

PILOT SIGN

The Pilot Sign is a lit, app-controlled, lightbox pilot car tow truck sign solution, and is a first-of-its-kind in Canada. Thus far, pilot signs have been controlled manually or with bulky controllers. Additionally, the Pilot Sign allows users to easily switch between signs by easily sliding in/out sign inserts and the sign is lit from the inside for better visibility. Users can also control the sign light, lower/raise the sign and control the lights all with a touch of an app. Bluetooth connectivity ensures reliability and efficiency.

MORE

PILOT SIGN: A Smart Pilot Car Truck Sign Solution.

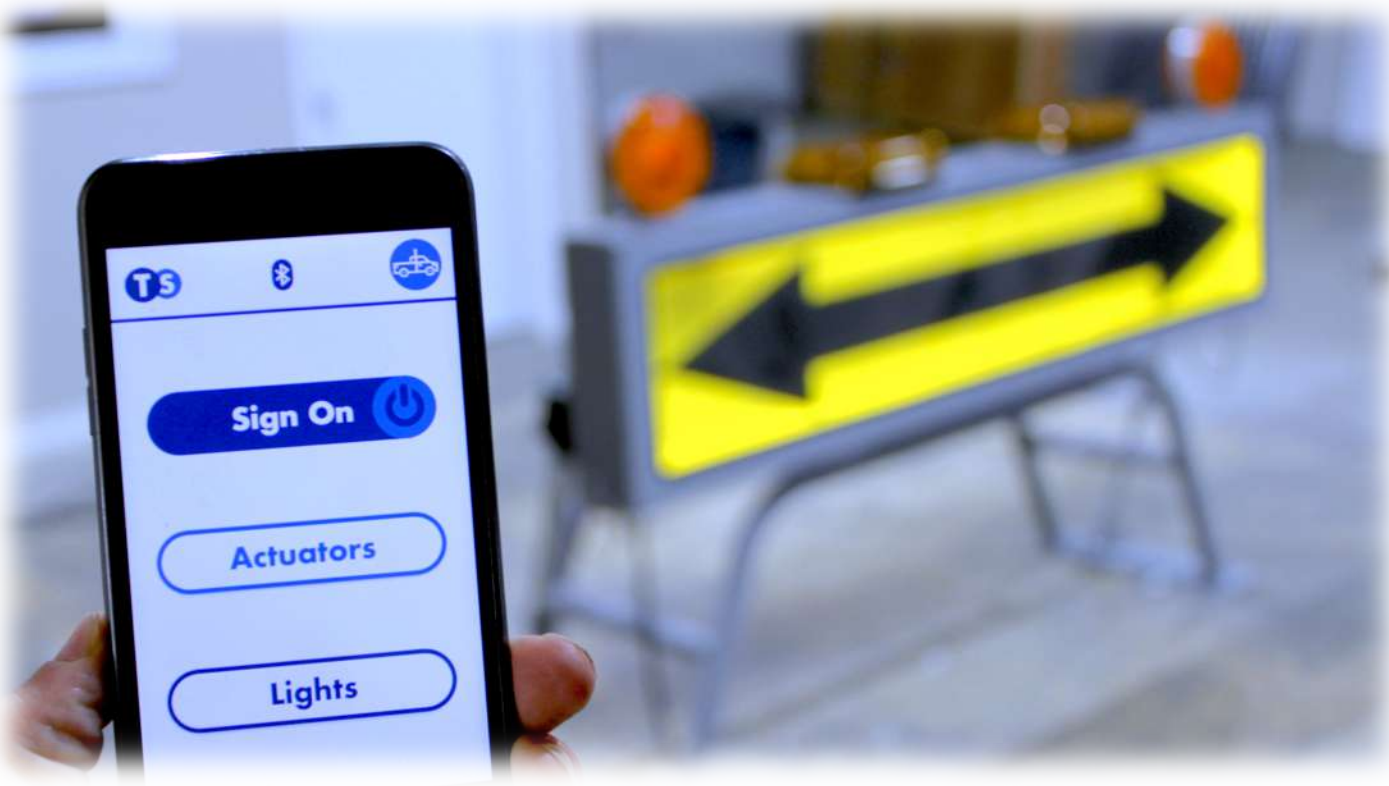

App lower/raises the sign, turns on/off the lightbox & controls all of the lights.

Sign inserts can easily be replaced by sliding in & out.

Bluetooth connectivity: update your sign regardless of network coverage.

DIGI PILOT SIGN

The Digi Pilot Sign is a digital LED VMS truck car pilot tow truck construction sign solution, and is a first-of-its-kind. Thus far, the pilot car industry has been using static signs, when most other industries are digitizing their signage. The Digi Pilot Sign not only is brighter and more visible (up to 175m), but can be fully controlled using our app. This means you can update your message, lower/raise the sign, control the brightness and control the strobe/bus lights; all with a touch of the app. The sign also boasts patented auto-dimming technology. This is your optimal road safety sign solution.

MORE

DIGI PILOT SIGN: A Digital LED Pilot Sign Solution.

Customize your message & control hardware functions using our app.

Double-sided color sign w/ 175m visibility & patented auto-dimming technology.

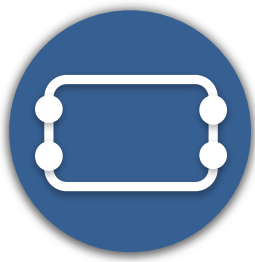

Sign connected via Wi-Fi for optimal connectivity & remote controlling.

DIGIPORT SIGN

The DigiPort Sign is a digital LED portable sign solution, and is a first-of-its-kind in Canada. Thus far, the smaller digital LED signs are either limited in applications and/or arduous to update. No other sign of its size offers such portability (8hr+ battery life), easy-of-use (smartphone app) and mounting possibilities. It is the perfect sign for displaying promotions, business hours and anything else you'd like your customer to know. Control messages, brightness and other customized options, all with a touch of the app.

MORE

DIGIPOINT SIGN: A Digital LED Portable Sign Solution.

Customize your message, control brightness & message rotation using our app.

P4 modules (22"x11") create a bright, attractive display.

Wireless connectivity: update your sign from afar & includes 8hr battery life.

DIGIBILL SIGN

The DigiBill Sign is a digital LED billboard outdoor sign solution, and is the most cost-effective solution of its kind in Canada. What sets our billboards apart is our in-house manufacturing capabilities to match your every specification. Our ability to manufacture our billboards in-house means we can also offer more cost-effective solutions and allow for further customization than other sign companies. By owning a DigiBill, you have the opportunity to generate more income than from any other sign by selling ad space.

MORE

DIGITRAIL SIGN

The DigiTrail Sign is a digital LED trailer road safety sign solution, and is the most reliable and easy-to-update trailer sign in Canada. No need for bulky controllers or having to stand next to the sign to update it. It's the smartest road safety sign yet. With our GSM technology, you can update your sign from anywhere in the world; securely and reliably. Our DigiTrail Sign also features lockable display, sign-tracking, powder-coating and P20 modules; the highest resolution message board in Canada.

FWMS SIGN

Our newest technology digital LED signs product is the FWMS Sign, which is a Flood-Warning Messaging System solution. To date, there have been no solutions for warning road users of underpass flooding in real-time in Canada or elsewhere. Since underpass flooding can lead to serious accidents, warning road users well ahead of time is imperative. This is exactly what the FWMS Sign seeks to achieve and keep the roads safe. We aim to help our cities in their Vision Zero goals and offer the safest outdoor road LED safety sign solution yet.

MORE

FWMS SIGN: Flood-Warning Messaging System Sign Solution.

3 semiconductor & 1 ultrasonic sensor used to detect flooding in real-time.

Message boards placed before turn offs & mounted on bridge for greatest visibility.

System connected via 3G networks for real-time warning display messaging.

UNDER DEVELOPMENT

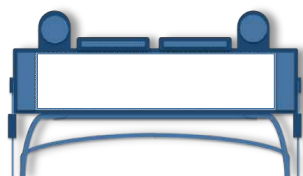

CWMS SIGN

As a company focused on innovation, we always have products that are under development. We focus mainly on LED, digital, outdoor and safety signs for the Alberta and Canada market, and beyond. Currently, we are working on the CWMS Sign, which is a City-Wide Messaging System solution. This is an extension of the FWMS Sign, and will incorporate a centralized hub to operate all of the signage from one location for the whole city. Utilizing our software and hardware technologies, we strive to create a safer and smarter city.
