Spanish Proficiency Assessments

Count on our 25 years of experience evaluating and improving the business communication skills of tens of thousands of job candidates and employees in a variety of industries. Arial International, a global multicultural, multilingual consulting, training and services firm, serves clients in the U.S. Hispanic market and Latin America. Since 1992 Arial International has been the innovative leader in the design and delivery of "Business Spanish" services including assessments, translations, bilingual training and e-learning tailored for companies who target and retain U.S. Hispanic customers. More than 35,000 professionals around the world have successfully completed our training programs!

VERBAL AND WRITING LANGUAGE PROFICIENCY TESTS

VERBAL ASSESSMENTS: An effective testing tool for heritage speakers in the workplace. Our assessment is a standardized, structured telephone dialogue evaluating the candidate's functional speaking and comprehension proficiency in a business environment in Spanish, English or both languages.

WRITING SKILLS ASSESSMENT: The ideal testing tool for translators and e-skill representatives who read and write using WebChat and e-mail customer communication.

SCORED EVALUATION REPORT: A quantitative and qualitative recommendation sent via e-mail. Our proprietary scoring model maps to the CEFRL, the industry standard for language assessments.

Our assessment process is objective, fully validated and was designed, standardized and tested to remove bias with regard to race, sex, native language, ethnic origin and geographic region.
