

# EXCALIBUR 5000

## DESCRIPTION:

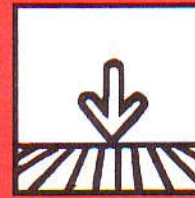

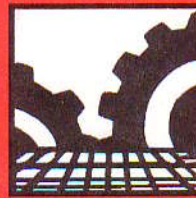

**Excalibur 5000 is an industrial strength alkaline cleaner concentrate formulated around the most state of the art cleaning technology available today. It contains twice the active ingredients of many alkaline cleaners presently being sold thus making it extremely low cost to use.**

Excalibur 5000 incorporates emulsifiers, soil destructive and peptizing agents that synergize the action of the builders to provide rapid, complete oil and dirt breakdown. These oily contaminants are emulsified and dispersed completely so that they do not interfere with rinsing. Built-in water softeners ensure that water hardness in make-up water is tied up and does not remove any cleaning power.

Excalibur 5000 will easily clean most plastic, rubber, porcelain, concrete as well as a variety of metal surfaces without leaving a white residue on the surface after rinsing. It will take on any cleaning chore from light duty to the toughest. It is safe on most surfaces that can be cleaned with water.

## Excalibur 5000 offers the following advantages:

- Excalibur 5000 contains no phosphates and is biodegradable - reduces disposal problem.
- Is non toxic and non flammable - safe for employees to handle.
- Contains no free hydroxides - will not clog steam cleaning and high pressure hot water machines
- Rapid penetration.
- Versatile - may be applied by hand, immersion, spray, steam gun, high pressure hot water or scrubber.
- Liquid - easily diluted and totally dissolved, unlike powdered products.
