

Environmental Management

Boyd Dionysius Jouman

Boyd obtained his degree in Town Planning in UK and studied Architecture. His key expertise and interest is in the area of environment, including urban and rural environment, low carbon society, climate-resilient cities and the green economy. He led the development of the Low Carbon Society Blueprint for Iskandar Malaysia, the Environmental Planning Blueprint, the Shoreline Management Plan and the Planning & Design Guidelines for Commercial and Industrial Building amongst others. He heads the Environment Division at IRDA and is a regular speaker at both national and international events including in the UK, Japan, South Korea, Vietnam, Cambodia, Thailand, Indonesia, Singapore and Malaysia.

Velerie Siambun

Velerie has over 10 years of experience in the environmental management field and involvement in various environmental related studies and projects within Malaysia and other Asean countries. Her previous project involvement includes environmental impact assessment, environmental management plans and programmes, integrated shoreline management plan as well as development of environmental policy and EIA guideline. Velerie is currently the Vice President of IRDA's Environment Division under the Green Resources Unit. She is responsible for the environmental planning and management of Iskandar Malaysia including working on the implementation of Green Economy Guidelines and setting up of the Environmental Trust Fund for Iskandar Malaysia. Velerie is very committed, interested and experienced in the area of environment.
