

ILLIANA BASEMENT WATERPROOFING

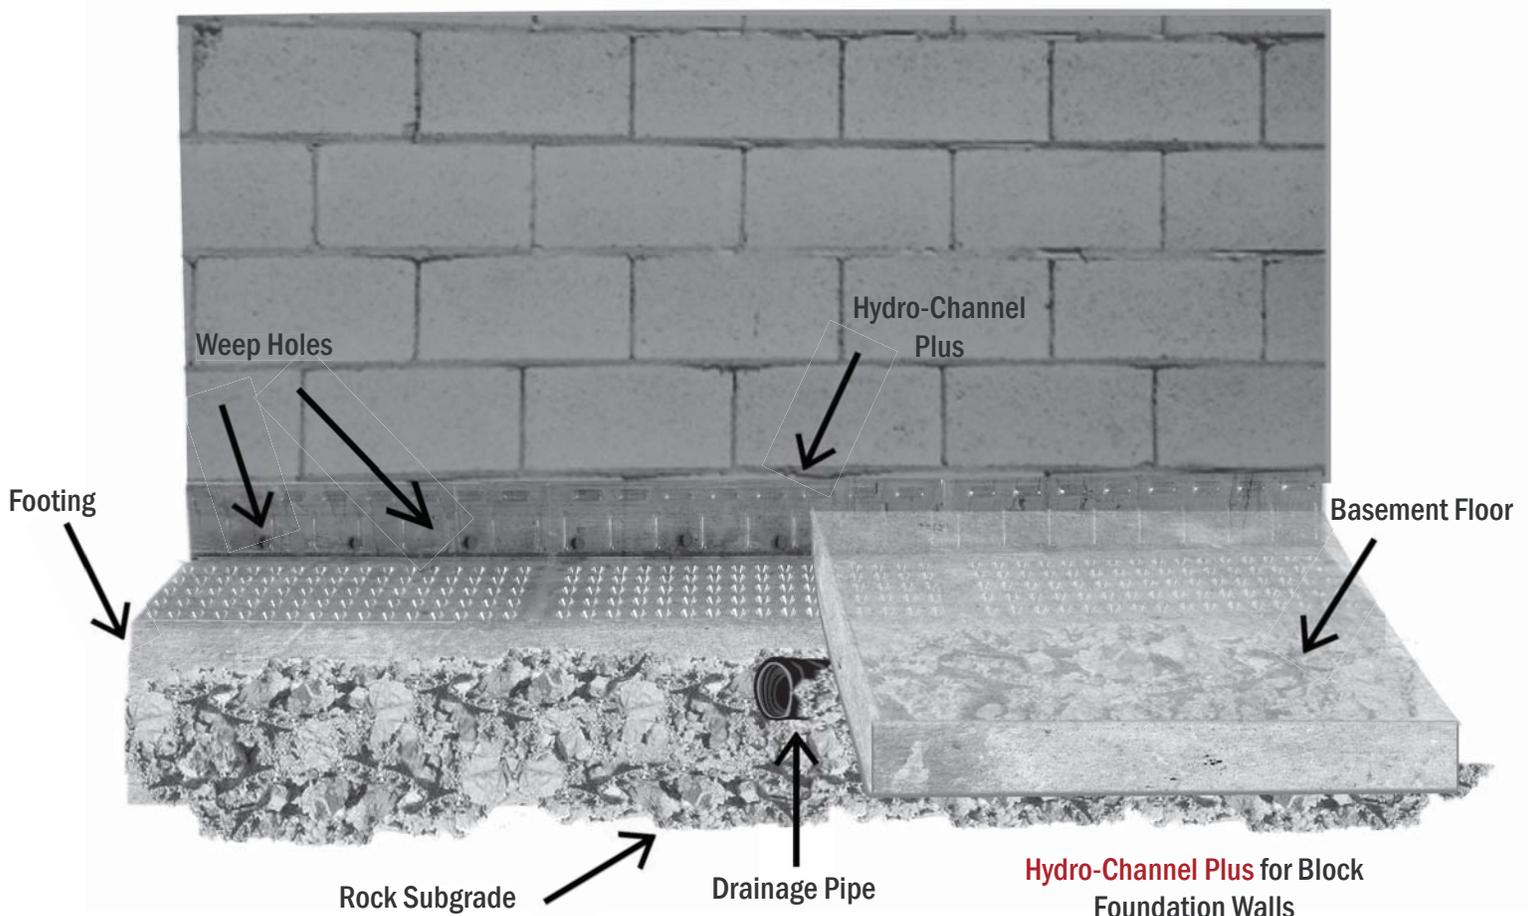

Hydro-Channel Plus

Interior Basement Waterproofing System

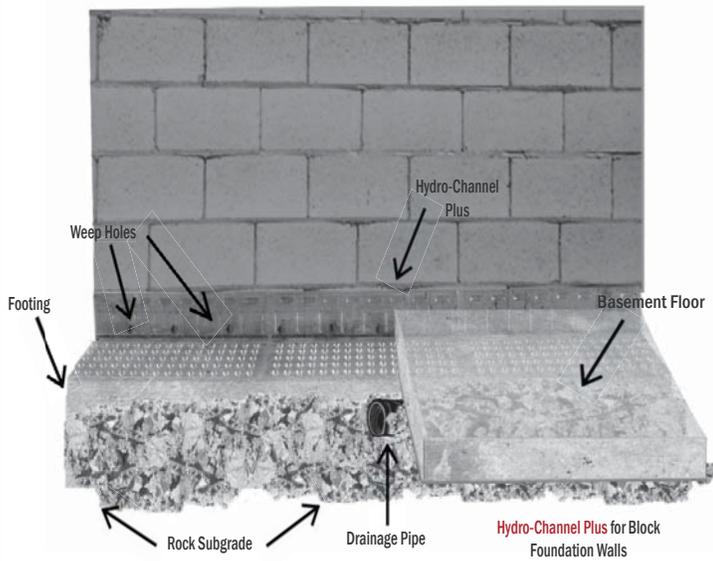

Hydro-Channel Plus is an interior footing drainage system designed to prevent water seepage from entering the cove area of the basement (area where the floor meets the wall) and allows foundation wall seepage to drain harmlessly beneath the floor.

The convenient, pre-formed, snap-together design virtually eliminates the need for nailing and reduces installation time vs typical dimple board installations.

- Designed for block wall foundations.
- Optically clear for easy inspection during pour of floor.
- Heavy duty, reinforced channel will not collapse during pour.
- Directs foundation wall seepage beneath basement floor.
- Prevents water seepage from entering the cove area of the floor.
- The heavy duty clear construction creates a clean finished look.

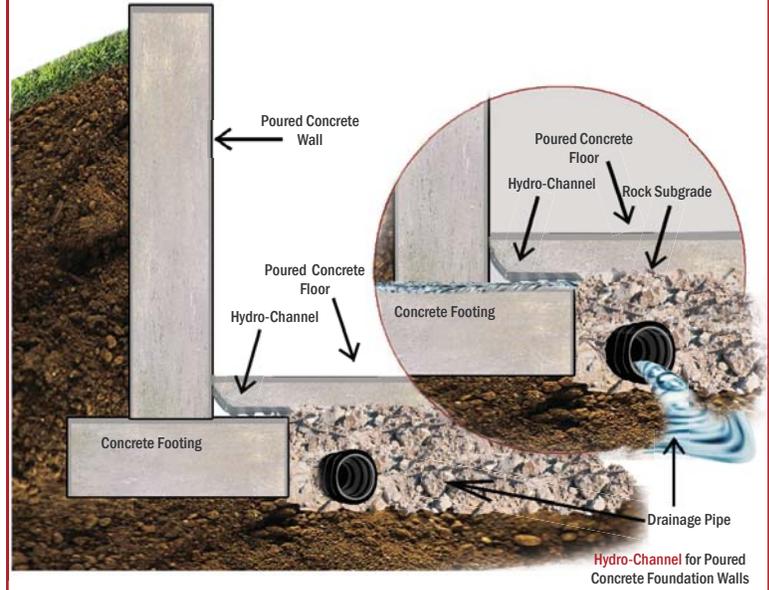

Hydro-Channel Plus

Hydro-Channel Plus for Block Foundation Walls

Hydro-Channel

Hydro-Channel for Poured Concrete Foundation Walls

Hydro-Channel Plus
for Block Foundation
Walls
5"H x 8½"W x 6'L

Hydro-Channel for
Poured Foundation
Walls
2½"H x 8½"W x 5'7½"L

- The **Hydro-Channel Plus** is designed for use with block wall foundations.
- Optically clear for easy inspection during pour of floor.
- Directs foundation wall seepage beneath the basement floor.
- Heavy duty, reinforced channel will not collapse during pour.
- Prevents water seepage from entering the cove area of the floor.

ALSO AVAILABLE.....

- The **Hydro-Channel** is designed for use with poured concrete walls.
- Creates thermal break between footing and basement floors.
- Prevents water seepage from entering the cove area of the floor
- Allows the floor to be poured all the way to the wall.
- Extra wide to allow footing/slab separation which will help reduce cracks in basement floors.
