

T-shirt hoop installation process:

Step 1=>take hoop right handrail and align with the screw hole

Screw up with hexagon screw but don't tighten it

Step 2=> Take left handrail of the hoop and install as same as step1

Step3=> take the t-shirt hoop

Parallelly Pull the two sides of the t-shirt hoop into the handrail

After adjusting them at parallel position, tighten the screw on both sides

Installation finished

Cap attachment installation process

Step1=> take the cap attachments

Step2=>Make sure the rail of cap attachment is aligned with the screw hole of X direction
railway

Step 3=>Tighten with hexagon screw driver

Installation finished

Flat table and flat sash frame installation

Step 1=> take the table

Parallelly push it as the video shows

Step 2=> align the screw hole on both sides and then screw up with cross screw, but don't
tighten them till the height and position of the table has been well adjusted

Step3=> take the flat hoop

As shown in the video

Find the screw hole

And tighten the screw on both sides

Installation finished
