

Dr. Anna Mercedes Nierenberg

CONTACT INFORMATION	University of California Irvine Physics & Astronomy Department Irvine, CA 92697-2575	<i>e-mail:</i> nierenberg.1@osu.edu <i>web:</i> https://nierenbergblog.wordpress.com/
ACADEMIC POSITIONS	University of California Chancellor's Fellow Department of Physics and Astronomy, University of California Irvine CCAPP Postdoctoral Fellow Center for Cosmology and AstroParticle Physics, The Ohio State University Graduate Student Researcher University of California, Santa Barbara Thesis advisor, Tommaso Treu Teaching Assistant University of California Santa Barbara Undergraduate Student Researcher University of California, Los Angeles PI Jianwei Miao Undergraduate Student Researcher Scripps Institute of Oceanography PI Michael Latz	September 2017- September 2014 to September 2017 April 2009 to August 2014 September 2008 to April 2009 September 2007 to March 2008 June 2007 to August 2007
FELLOWSHIPS AND AWARDS	UCSB Dean's Fellowship Worster Undergraduate Research Mentor Fellowship Physics Chair's Fellowship	September 2012 to June 2013 June 2012 to September 2012 April 2012 - June 2012
EDUCATION	Ph. D. Physics , University of California Santa Barbara B. S. Physics, <i>summa cum laude</i> , University of California Los Angeles	September 2014 June 2008
OBSERVING PROPOSALS AND GRANTS	Principal-Investigator <i>Hubble Space Telescope</i> GO-15177, 'Testing CDM with the WFC3 Grism', Cycle 25, 18 orbits, WFC3 IR imaging and grism, TBD, (PI)	

Hubble Space Telescope GO-13732, ‘Detecting dark matter substructure with narrow-line lensing’, Cycle 21, 10 orbits, WFC3 IR imaging and grism, \$70,759 (PI)

Hubble Space Telescope AR-13271, ‘The cosmic evolution of faint satellites as a test of galaxy formation and the nature of dark matter’, archival proposal, \$59,784 (Co-PI)

Co-Investigator

Hubble Space Telescope GO-15320, ‘Probing the dark universe with quadruply imaged quasars’, Cycle 25, 26 orbits, WFC3 IR, UVIS, TBD, (Co-I)

Keck Observatory, Keck I and II telescopes, 10 nights (OSIRIS, NIRC2)

Lick Observatory, 3 m telescope, 17 nights (Kast, IRCAL)

TEACHING

Physics 3L

Mechanics lab, teaching assistant, UCSB Fall 2008

Physics 4L

Electromagnetism lab teaching assistant, UCSB Winter 2009

ACADEMIC
SERVICE

NASA Keck TAC

CCAPP seminar co-organizer, OSU, Spring 2016.

CCAPP summer seminar co-organizer, OSU, Summer 2015.

Physics graduate student life committee, UCSB, 2008 to 2009 academic year.

MNRAS Referee

OUTREACH

Space in Your Face YouTube Channel

Co-host, Youtube outreach channel with astronomy news, Spring 2015 to present

Columbus Fair Physics Volunteer

Ran a booth demonstrating light components, August 2016

Columbus Science Pub Speaker

Public lecture on dark matter, June 2016

Science day at Innis Elementary

Created and presented an educational slideshow about astronauts for K-2 students, Winter 2015

Adopt-A-Physicist

Communicate with several high school classes about being a physicist over the course of several weeks, Fall 2015, Fall 2009- 2013, Spring 2011

Astronomy on Tap

Speaker and co-organizer, Spring 2015.

JW Science Extravaganza

Elementary School crater exhibit presenter, April 2015.

La Colina Middle School Career Day

Discuss science career with middle school students October 2011, 2012

STUDENT
ADVISING

Daniella Roberts

Bridge graduate student in Physics, The Ohio State University. Measuring the luminosity function of satellites around sub-Milky Way mass host galaxies. Supervised with Professor Annika Peter. May 2016 to present.

Kaitlin McTague

Undergraduate in Astronomy and Astrophysics, The Ohio State University. Searching for new ultra-faint satellite galaxies in the local volume. Supervised with Professor Annika Peter.
May 2016 to present.

Dylan Oldenburg

Undergraduate in Physics, UCSB. Measured the luminosity function of satellites around gravitational lenses. June 2012-November 2013.

INVITED TALKS

Kavli IPMU, 'The Astrophysics of Dark Matter' conference, October 2016

University of Texas at Dallas, 'Symposium on relativistic astrophysics', December 2013

The Ohio State University, CCAPP Seminar, October 2013

INPAC, panel member 'LCDM and astronomical probes of dark matter physics', April 2013.

Pepperdine University, Science Seminar, October 2012

CONTRIBUTED
TALKS

Leiden University, 'Astrophysics of Dark Matter' workshop, April 2016.

Kavli IPMU, 'Galaxies and cosmology in light of strong lensing' conference, October 2014.

223 AAS meeting, January 2015

Courmayeur Italy, 'Galaxy formation under the magnifying glass of gravitational lensing' workshop, June 2013.

University of California, San Diego, 'Keck Science Meeting', September 2012.

University of Bologna, 'Dark Matter from Globular Clusters to Clusters of Galaxies', September 2012.

Courmayeur, Italy, 'Strong lensing from stars to dark matter halos', workshop, June 2012.

SEMINARS

Carnegie Observatories, May 2016, lunch talk

Leiden University, April 2016, Galaxy lunch talk

UC Santa Barbara, April 2015, Astronomy lunch talk

Yale, January 2014, Galaxy lunch talk

UC Irvine, Astrophysics Seminar, November 2013
California Institute of Technology, Tea Talk, November 2013
UCSD, Journal Club, November 2013
UCLA, Journal Club, November 2013
UC Berkeley, Galform talk, October 2013
Stanford, KIPAC tea talk, September 2013
UC Santa Cruz, cosmo-club seminar, September 2013
Jet Propulsion Laboratories, astrophysics lunch seminar, May 2013.
UC Davis, cosmology seminar, January 2013.
Carnegie Observatories, lunch talk, May 2012.

SOFTWARE

Python, Mathematica, Matlab:

linear algebra, linear optimization, Markov Chain Monte Carlo methods, Bayesian statistical inferences, image pattern recognition, numerical integration and differentiation

Astronomical Data Analysis:

OSIRIS data reduction, NIRC2 data reduction, HST grism reduction, astrodrizzle, Lens-model and Gravlens, SourceExtractor, Bayesian Photo Z, astroconda
