Prism Inflatable Lighting System

The Prism PIL1000 Inflatable Light provides the ideal high-performance lighting solution for any situation. Whether it's a worksite, special event or accident scene, the prism light is the perfect lightweight, compact and extremely portable solution.

Key Features

- Illuminates area of up to 10,000 square metres
- Achieves maximum illumination (95,000lm) in around 3 minutes
- Cools and deflates for storage in under 5 minutes
- Easy to operate
- New Ball Tearer 3.5KW Generator

Magnam Torch

The Magnum Heat Torch is a simple and cost-effective method of applying preformed thermoplastic pavement marking materials. The Magnum Torch with self-contained torch ignition is a wide mouth propane torch for applying preformed thermoplastic pavement markings such as Premark®. Torch assembly must be used with approved container equipped with a U.L. listed shut-off valve. It is important to always use the two-hand grip handles to properly direct the flame toward the pavement.

Key Features

- Produces 210,00 to 300,000 BTU at sea level
- 16" handle torch with igniter
- All brass torch body
- Single fire shroud with Piezo lighter
- Pressure regulator and 25 ft. of flexible hose
- Utilizes an accelerated thrust of air heated by a short flame
- Lightweight and balanced design with an aluminium counterweight to decrease operator fatigue
- Automatic safety shut off valve in case of leakage or breakage of hose or connector
