

## **BITUMEN & ADHESIVES**

### **Adhesive Products**

Adhesives and Epoxy's are the glues that stick our products to the road – securely, safely and with efficiencies that get our products stuck to your surfaces faster and easier than most competitors. As our adhesives are fast to affix, project and staff costs can be reduced by up to 60% compared to competing and traditional epoxy based products.

#### **Pavement Marker Pads**

- No more mixing of messy epoxy
- No more wastage of unused adhesive
- Approximately 90 seconds to apply
- Cures within 2 minutes, allowing immediate reopening of closed road sections
- More economical
- Reduces workload by up to 40%, reducing staff and overall project costs.

#### **Self Adhesive Marker Pads**

Ideally suited for temporary or construction zone situations

- Double sided Adhesive with removable paper covers
- Requires no heating of Road surface or Marker Pad

#### **Bituminous Adhesive Blocks**

This exceptional adhesive has been developed without the use of rubber polymers and other UV susceptible substances. It has sustained rigorous long-term tests by State Road authorities and has earned the highest regard as a flexible adhesive for reflective and non-

reflective pavement markers on concrete as well as bitumen surfaces.

Benefits:

- Environmentally friendly, no cardboard boxes to dispose of, saving time and labour
- Outer shrink-wrap cover melts into Bitumen Adhesive and is completely miscible
- Easier to split blocks, due to the new layered manufacturing process allows block separation for quicker melting than other 5kg solid blocks

## Support and Service

At RRSP, we look to offer our customers the right road and pavement system solution through a combination of fast service, reliable inventories, knowledgeable people, personalized attention, and competitive pricing which is perceived by our customers to be the best value available. Have a question on this product or any other we offer give us a call
