

The visual look of the Classic and the Rapid Woody cabins are almost identical, solid, rustic and attractive

The Classic Series is built with individual solid log components that are stacked
The Rapid Cabin Series uses log sided insulated panels that are tipped into place
Giving you choices to let you save money and installation time

**Woody Classic Cabins tm - Solid log walls
Introduced in 2004**

**Woody Rapid Cabin tm log wall panel system
New for 2018**

**Similar interior layouts
for both systems**

Materials list available for both the Classic and the Rapid Cabin Woody Log Building Systems tm

The "Dry In" is a complete kit that includes all the building materials to get the Woody Cabin "Dried In" which means when installed the cabin is basically complete on the outside including log outside walls, wooden cabin floor, Energy Star maintenance free windows, construction grade lockable doors, R-38 roof insulation, R-11 wall insulation, soffit, fascia, gable end finish materials, all flashing and a water tight roof membrane. Actual roofing should be purchased locally and is not included. The interior includes a knotty pine ceiling, interior rough frame walls, timber style rafters, finish window sills, storage loft and all unique hardware required for installation. Local building codes may require some minor deviations. Foundations and actual roofing are not included. *Bunk rooms do not include a wooden cabin floor and include an R-8 roof insulation. Many smaller cabins are built on a concrete slab.
