

## **PULL STATION**

**Measure D public info: from the Fire District**

### **Measure D**

**1978 operational cost projections, with 1994 income, at 2018 prices**

**For those of you who can remember back to 1978 and what things costs, now... have that be the projection of how much money you will need to operate your home or business in to the future. Now think back to what your income was in 1994. It is more than 1978 so things are ok in 1994. Now try and use 1994 income to pay 2018 prices. This is the primary issue faced by Shasta Lake Fire District and all fire districts right now.**

**The principal income for the Shasta Lake Fire District is a portion of property taxes. When property values are up so is the income. When they are down so is the income.**

**Measure D can help solve this math problem**

**Stabilize funding to maintain current staffing to continue basic services to the public.**
